

will be incurred as offices are realigned, not all at once.

v. *Space alteration costs in the ten remaining offices (\$20M)*. There will be a one-time cost to reconfigure the space in the remaining MFH offices, or locate alternate facilities if space alterations are not feasible, to accommodate the increase in staff. These costs are estimated at \$20M and will incur throughout the various phases of the realignment.

vi. *Training costs (\$500,000)*. Employees will be provided with training on performing the new roles under the enhanced operating model.

b. *Reoccurring Costs:*

Operating Costs (\$0). It is anticipated that the MFH reorganization impact on travel funding will be minimal.

(3) Study of the Impact on the Local Economy

It is anticipated that 25–50 percent of impacted employees (197–395) will be reassigned to an alternate location. Any impact on the local economies in terms of housing, schools, public services, taxes, employment and traffic congestion will be minimal.

(4) Estimate of the Effect of the Reorganization

As mentioned above, workload will be spread virtually across the remaining Hubs and satellite offices based on utilization. This will result in increased efficiency gains in both Asset Management and Asset Development and help to balance workload across the remaining Hubs and satellite offices. Additionally, developing new, more generalized roles that can perform multiple functions, will allow employees to more effectively support processing and perform multiple functions as workload ebbs and peaks. Program delivery will not be impacted as workload will be shared across remaining locations and employees will become more flexible in performing multiple tasks.
