

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Rural Business-Cooperative Service

Title: Rural Micro-Entrepreneur Assistance Program.

OMB Control Number: 0570-0062.

Summary of Collection: Section 6022 of the Food, Conservation, and Energy Act of 2008 (2008 Farm Bill) authorizes the Rural Micro-entrepreneur Assistance Program (RMAP). The Secretary makes direct loans to rural microenterprise development organizations (MDOs) that are participating in the program (who are referred to as "micro-lenders") for the purpose of capitalizing microloan revolving funds to provide fixed interest rate business loans of \$50,000 or less to micro-entrepreneurs, as defined in the 2008 Farm Bill.

Need and Use of the Information: The program provides rural micro-entrepreneurs with the skills necessary to establish new rural microenterprises; to provide continuing technical and financial assistance related to the successful operation of rural microenterprises; and to assist with the cost of providing other activities and services related to the successful operation of MDOs and rural microenterprises. Micro-lenders seeking loans and/or grants will have to submit applications that include specified information, certifications, and agreements to the Agency. This information will be used to determine applicant eligibility and to ensure that funds are used for authorized purposes.

Description of Respondents: Business or other for-profit;

Number of Respondents: 73.

Frequency of Responses: Reporting: Quarterly, Annually.

Total Burden Hours: 3,327.

Charlene Parker,

Departmental Information Collection Clearance Officer.

[Docket No. APHIS-2012-0033]

Stine Seed Farm, Inc.; Extension of a Determination of Nonregulated Status of Corn Genetically Engineered for Herbicide Resistance

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service is extending to maize line HCEM485, which has been genetically engineered to be resistant to the herbicide glyphosate, our determination of nonregulated status of Roundup Ready® corn line GA21. Therefore, APHIS no longer considers maize line HCEM485 to be a regulated article under Agency regulations governing the introduction of certain genetically engineered organisms. Our decision is based on our evaluation of data submitted by Stine Seed Farm, Inc., in its request for an extension of a determination of nonregulated status, an analysis of other scientific data, and comments received from the public in response to a previous notice announcing our preliminary determination. This notice also announces the availability of our written determination, final environmental assessment, plant pest risk assessment, and our finding of no significant impact.

DATES: *Effective Date:* May 3, 2013.

ADDRESSES: Supporting documents, comments we received on our previous notice announcing our preliminary determination, and our responses to those comments may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2012-0033> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming. Supporting documents are also available on the APHIS Web site at http://www.aphis.usda.gov/biotechnology/petitions_table_pending.shtml under APHIS Petition Number 09-063-01p Extension of 97-099-01p.

FOR FURTHER INFORMATION CONTACT: Dr. Rebecca Stankiewicz Gabel, Chief, Biotechnology Environmental Analysis

Branch, Environmental Risk Analysis Programs, Biotechnology Regulatory Services, APHIS, 4700 River Road Unit 147, Riverdale, MD 20737-1236; (301) 851-3927, email: rebecca.l.stankiewicz-gabel@aphis.usda.gov. To obtain copies of the supporting documents, contact Ms. Cindy Eck at (301) 851-3885, email: cynthia.a.eck@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

Under the authority of the plant pest provisions of the Plant Protection Act (PPA) (7 U.S.C. 7701 *et seq.*), the regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests," regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered (GE) organisms and products are considered "regulated articles."

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. Further, the regulations in § 340.6(e)(2) provide that a person may request that APHIS extend a determination of nonregulated status to other organisms. Such a request must include information to establish the similarity of the antecedent organism and the regulated article in question.

In a notice published in the **Federal Register** on December 5, 1997 (62 FR 64350-64351, Docket No. 97-052-2), APHIS announced our determination of nonregulated status of Roundup Ready® corn line GA21. APHIS received a request for an extension of a determination of nonregulated status (APHIS Number 09-063-01p) of Roundup Ready® corn line GA21 to maize line HCEM485¹ from Stine Seed Farm, Inc., (Stine Seed) of Research Triangle Park, NC. In its request, Stine Seed stated that this corn is similar to Roundup Ready® corn line GA21 and, based on the similarity to the antecedent organism, is unlikely to pose a plant pest risk and, therefore, should not be

¹ The terms "corn" and "maize" both refer to *Zea mays*. In this notice, we refer to "maize line HCEM485" as this is the name used by Stine Seed in its extension request to identify its GE corn. Otherwise, we use the more common term "corn" when referring to *Zea mays*.

a regulated article under APHIS' regulations in 7 CFR part 340.

On February 27, 2013, APHIS published a notice² in the **Federal Register** (78 FR 13303–13304, Docket No. APHIS–2012–0033) announcing the availability of a draft environmental assessment (EA) and plant pest risk assessment (PPRA) for public comment for the Stine Seed extension request. The extension request and APHIS' preliminary decision were also published with that notice. APHIS received three comments on the subject EA and PPRA during the designated 30-day public comment period, which ended March 29, 2013. Issues raised during the comment period included effects of glyphosate, pollen drift, crop diversity, and human health concerns. APHIS has addressed the issues raised during the comment period and has provided responses to these comments as an attachment to the finding of no significant impact (FONSI).

National Environmental Policy Act

To provide the public with documentation of APHIS' review and analysis of any potential environmental impacts associated with the determination of nonregulated status of maize line HCEM485, an EA has been prepared. The EA was prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372). Based on our EA, the response to public comments, and other pertinent scientific data, APHIS has reached a FONSI with regard to the preferred alternative identified in the EA.

Determination

Based on APHIS' analysis of field and laboratory data submitted by Stine Seed, references provided in the extension request, peer-reviewed publications, information analyzed in the EA, the similarity of maize line HCEM485 to the antecedent organism, Roundup Ready[®] corn line GA21, comments provided by the public, and information provided in APHIS' response to those public comments, APHIS has determined that maize line HCEM485 is unlikely to pose a plant pest risk. We are therefore extending the determination of

nonregulated status of Roundup Ready[®] corn line GA21 to maize line HCEM485, whereby maize line HCEM485 is no longer subject to our regulations governing the introduction of certain genetically engineered organisms.

Copies of the signed determination document, as well as copies of the extension request, PPRA, EA, and FONSI and response to comments, are available as indicated in the **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** sections of this notice.

Authority: 7 U.S.C. 7701–7772 and 7781–7786; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 29th day of April 2013.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

J.R. Simplot Co.; Availability of Petition for Determination of Nonregulated Status of Potato Genetically Engineered for Low Acrylamide Potential and Reduced Black Spot Bruise

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service (APHIS) has received a petition from the J.R. Simplot Company (Simplot) seeking a determination of nonregulated status of potatoes designated as Innate[™] potatoes (events E12, E24, F10, F37, J3, J55, J78, G11, H37, and H50), which have been genetically engineered for low acrylamide potential (acrylamide is a human neurotoxicant and potential carcinogen that may form in potatoes and other starchy foods under certain cooking conditions) and reduced black spot bruise. The petition has been submitted in accordance with our regulations concerning the introduction of certain genetically engineered organisms and products. We are making the Simplot petition available for review and comment to help us identify potential environmental and interrelated economic issues and impacts that APHIS may determine should be considered in our evaluation of the petition.

DATES: We will consider all comments that we receive on or before July 2, 2013.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!documentDetail;D=APHIS-2012-0067-0001>.

- *Postal Mail/Commercial Delivery:*

Send your comment to Docket No. APHIS–2012–0067, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2012-0067> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

The petition is also available on the APHIS Web site at http://www.aphis.usda.gov/brs/aphisdocs/13_02201p.pdf.
