

of the SO₂ NAAQS will be assessed in the forthcoming SO_x ISA.

As part of this review of the SO₂ NAAQS, EPA intends to sponsor a workshop on June 12–13, 2013, in Research Triangle Park, North Carolina to highlight significant new and emerging SO_x research, and to make recommendations to the Agency regarding the design and scope of the review for the primary (health-based) SO₂ standards to ensure that it addresses key policy-relevant issues and considers the new science that is relevant to informing our understanding of these issues. In addition, other opportunities for submission of new peer-reviewed, published (or in-press) papers will be possible as part of public comment on the draft ISAs that will be reviewed by CASAC. Workshop discussions are intended to build upon three prior publications or events (see http://www.epa.gov/ttn/naaqs/standards/so2/s_so2_index.html to obtain a copy of these and other related documents):

- Primary National Ambient Air Quality Standard for Sulfur Dioxide; Final Rule (40 CFR Parts 50, 53, and 58, June 22, 2010). The preamble to the final rule included detailed discussions of policy-relevant issues central to the last review.

- Integrated Science Assessment for Sulfur Oxides—Health Criteria (EPA 600/R-08/047F, September 2008).

- Risk and Exposure Assessment to Support the Review of the SO₂ Primary National Ambient Air Quality Standard (EPA 452/R-09/007, July 2009).

Based in large part on the input received during this workshop, EPA will develop a draft integrated review plan for the SO_x review that will outline the schedule, process, and approaches for evaluating the relevant scientific information and addressing the key policy-relevant issues to be considered in this review. CASAC will be asked to conduct a consultation with the Agency on the draft integrated review plan, and the public will have the opportunity to comment on it as well. The final integrated review plan will be used to frame each of the major elements of the SO_x review under the NAAQS review process: An integrated science assessment, a risk/exposure assessment, and a policy assessment.

SUPPLEMENTARY INFORMATION: The FDIC is requesting OMB approval to renew the following information collection:

Title: Occasional Qualitative Surveys.
OMB Number: 3064-0127.

Estimated number of surveys per year: 15.

Estimated response time per survey: 1 hour.

Estimated number of respondents per survey: 850 hours.

Total Annual Burden: 12,500 hours.

General Description of Collection: The information collected in these surveys is anecdotal in nature, that is, samples are not necessarily random, the results are not necessarily representative of a larger class of potential respondents, and the goal is not to produce a statistically valid and reliable database. Rather, the surveys are expected to yield anecdotal information about the particular experiences and opinions of members of the public, primarily staff at respondent banks or bank customers. The information is used to improve the way FDIC relates to its clients, to develop agendas for regulatory or statutory change, and in some cases to simply learn how particular policies or programs are working, or are perceived in particular cases.

Request for Comment

Comments are invited on: (a) Whether these collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimate of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Dated at Washington, DC, this 6th day of May, 2013.

Federal Deposit Insurance Corporation.
