Data Confidentiality Provisions: The confidentiality of Close Calls data is protected under the BTS confidentiality statute (49 U.S.C. 111(k)) and the Confidential Information Protection and Statistical Efficiency Act (CIPSEA) of 2002 (Public Law 107-347, Title V). In accordance with these confidentiality statutes, only statistical and non-identifying data will be made publicly available through reports. Further, BTS will not release to FRA or any other public or private entity any information that might reveal the identity of individuals or organizations mentioned in close call reports.

SUPPLEMENTARY INFORMATION:

I. The Data Collection

The Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35; as amended) and 5 CFR Part 1320 require each Federal agency to obtain OMB approval to continue an information collection activity. BTS is seeking OMB approval for the following BTS information collection activity:

Title: Confidential Close Call Reporting System.

OMB Control Number: 2139-0010.

Type of Review: Approval to continue to collect new information: Confidential Close Call Reporting System (C³RS).

Respondents: Employees of selected (pilot) railroad sites.

Number of Respondents: 3,100 (per annum).

Estimated Time per Response: 0.50 hours.

Frequency: Intermittent for approximately two (2) years. (Reports are submitted when there is a qualifying event, *i.e.* a close call occurs within a pilot site. The frequency of such an event is estimated to be two per day.)

Total Annual Burden: 365.00 hours.

II. Background

Collecting data on the nation's transportation system is an important

component of BTS' mission and responsibility to the transportation community as stated in its authorizing statute (49 U.S.C. 6302). BTS and FRA share a common interest in promoting rail safety based on better data. To that end, FRA's Office of Safety is sponsoring the Confidential Close Call Reporting System (C³RS) Demonstration Project to investigate the effectiveness of such a data collection system in improving rail safety. The data collection phase of this study was initiated in February, 2007 and is scheduled to continue for approximately 2 more years.

A close call represents a situation in which an ongoing sequence of events was stopped from developing further, preventing the occurrence of potentially serious safety-related consequences. This might include the following: (1) Events that happen frequently, but have low safety consequences; (2) events that happen infrequently but have the potential for high consequences (e.g., a train in dark territory proceeds beyond its authority); (3) events that are below the FRA reporting threshold (e.g., an event that causes a minor injury); and (4) events that are reportable to FRA but have the potential for a far greater accident than the one reported (e.g., a slow speed collision with minor damage to the equipment and no injuries.)

Employees involved in reporting a close call incident will be asked to fill out a report and participate in a brief, confidential interview. Employees will have the option to mail or submit the report electronically to BTS. Participants will be asked to provide information such as: (1) Name and contact information; (2) time and location of the event; (3) a short description of the event; (4) contributing factors to the close call; and (5) any other information that might be useful in determining a root cause of such event.

BTS collects close call reports submitted by railroad employees and protects the confidentiality of these data through its own statute (49 U.S.C. 6302(i)) and the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA). In addition, BTS is developing an analytical database containing the reported data and other pertinent information to determine root causes of frequently reported close calls. The database is a valuable tool to railroad carriers and the FRA in their effort to identify safety issues and provide corrective measures before an accident occurs.

Voluntary reporting of close calls to a confidential system can provide a tool

to identify and correct weaknesses in railroad safety systems before an accident actually occurs. The C³RS demonstration project offers a voluntary, cooperative, non-punitive environment to communicate safety concerns. Through the analysis of close calls the FRA and the railroad community receive information about factors that may contribute to unsafe events and the error recovery mechanisms that prevented an adverse consequence from occurring. Such information is used to develop new training programs, identify root causes of potentially adverse events, assess risk and allocate resources to address those risks more efficiently. In addition, the database provides rail safety researchers with valuable information regarding precursors to safety risks and contributes to research and development of intervention programs aimed at preventing accidents and fatalities.

III. Request for Comments

BTS requests comments on any aspects of these information collections, including: (1) The accuracy of the estimated burden of 365 hours detailed in Section I; (2) ways to enhance the quality, usefulness, and clarity of the collected information; and (3) ways to minimize the collection burden without reducing the quality of the information collected, including additional use of automated collection techniques or other forms of information technology.

Type of Review: Extension, without revision, of a currently approved collection.

Description: The collections of information are found in 12 CFR 18.3, 18.4, and 18.8. Section 18.3 requires the preparation of an annual disclosure statement and specifies how it must be made available to shareholders. Section 18.4 outlines what information the disclosure statement must contain, and provides that a bank may supplement its annual disclosure statement with an optional narrative. Lastly, § 18.8 requires that a national bank promptly furnish its annual disclosure statement upon request.

This program of periodic financial disclosure is needed not only to facilitate informed decision making by existing and potential customers and investors, but also to improve public understanding of, and confidence in, the financial condition of individual national banks and the national banking system. Further, financial disclosure reduces the likelihood that the market will overreact to incomplete information.
