

Governing Inspection, Certification, Standards and Audit Services for Fresh Fruits, Vegetables, and Other Products—CFR part 51 (Expires 10/31/13) and 0581–0234 Reporting Requirement under the Regulations Governing Instruction and Certification of Processed Fruits and Vegetables and Related Products 7 CFR part 52 (Expires 1/31/14). Upon approval AMS will request a discontinuation for 0581–0234 from OMB. Merging the Collections will enable the Division to more efficiently manage the collection and prevent duplication of burden.

**Regulations Governing Inspection, Certification, Standards and Audit Services for Fresh Fruits, Vegetables and Other Products—7 CFR Part 51 (0581–0125)**

*Estimate of Burden:* Public reporting burden for this collection is estimated to average 0.03 hours per response.

*Respondents:* Business or other for profit, nonprofit institutions, farms or federal, state, local or Tribal Government.

*Estimated Number of Respondents:* 8,657.

*Estimated Total Annual Responses:* 129,769.

*Estimated Number of Responses per Respondent:* 15.

*Estimated Total Annual Burden on Respondents:* 4,127.

Reporting Requirements under the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables and Related Products 7 CFR part 52 (0581–0234).

*Estimate of Burden:* Public reporting burden for this collection is estimated to average 0.33 hours per response.

*Respondents:* Business or other for profit, nonprofit institutions, farms or federal, state, local or Tribal Government.

*Estimated Number of Respondents:* 1,446.

*Estimated Total Annual Responses:* 15,218.

*Estimated Number of Responses per Respondent:* 11.

*Estimated Total Annual Burden on Respondents:* 4,990.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the

burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: May 7, 2013.

BILLING CODE 3410–02–P

**DEPARTMENT OF AGRICULTURE**

**Animal and Plant Health Inspection Service**

[Docket No. APHIS–2013–0031]

**Environmental Impact Statement; Feral Swine Damage Management**

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement and notice of public meeting.

**SUMMARY:** We are advising the public that the Animal and Plant Health Inspection Service plans to prepare an environmental impact statement (EIS) to address the need for a national feral swine damage management program to protect agriculture, natural resources, property, and human health and safety. This notice identifies potential issues and alternatives that will be studied in the EIS, requests public comments to further delineate the scope of the alternatives and environmental impacts and issues, and provides notice of public meeting.

**DATES:** We will consider all comments that we receive on or before June 12, 2013. We will also consider comments received at a public meeting to be held on May 23, 2013, from 1 p.m. to 5 p.m.

**ADDRESSES:** The meeting will be held at the USDA Center at Riverside, Oklahoma City Memorial Conference Center, 4700 River Road, Riverdale, MD 20737.

You may submit comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#/documentDetail;D=APHIS-2013-0031-0002>.

- *Postal Mail/Commercial Delivery:* Please send your comment to Project Managers, Feral Swine EIS, USDA APHIS–WS, 732 Lois Drive, Sun Prairie, WI 53590.

- At the public meeting in person at the USDA Center at Riverside, Oklahoma City Memorial Conference Center, 4700 River Road, Riverdale, MD 20737.

- By visiting [http://www.aphis.usda.gov/wildlife\\_damage/feral\\_swine/index.shtml](http://www.aphis.usda.gov/wildlife_damage/feral_swine/index.shtml) for details on how to access the public meeting via the Internet and to submit comments.

Supporting documents and any comments we receive on this notice may be viewed at <http://www.regulations.gov/#/docketDetail;D=APHIS-2013-0031> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

Additional information about feral swine may be viewed by visiting the APHIS feral swine Web page at: [http://www.aphis.usda.gov/wildlife\\_damage/feral\\_swine/index.shtml](http://www.aphis.usda.gov/wildlife_damage/feral_swine/index.shtml).

**FOR FURTHER INFORMATION CONTACT:** Dr. Kimberly Wagner, Staff Wildlife Biologist, Wildlife Services, APHIS, 732 Lois Drive, Sun Prairie, WI 53590; (608) 837–2727.

**SUPPLEMENTARY INFORMATION:**

**Background**

Feral swine are a harmful and destructive invasive species. Their geographic range is rapidly expanding and their populations are increasing exponentially across the United States. Feral swine also occur in Guam, Puerto Rico, U.S. Virgin Islands, the Northern Mariana Islands, and American Samoa. Feral swine can inflict significant damage to numerous resources including physical damage to crops and property; predation on livestock; disease transmission threats to livestock, humans, and wildlife; and other threats to human health and safety. Feral swine also damage natural resources including sensitive habitats and endangered species. The Tribes, States, and Territories have legal authority to manage feral swine. Executive Order 13112 directs Federal agencies to use their programs and authorities to prevent the introduction of invasive species, control populations of invasive species, and minimize the economic or environmental harm, or harm to human health caused by invasive species. The Animal Plant Health Inspection Service (APHIS) has been receiving increased numbers of requests from local governments and private entities to assist with feral swine damage management.

APHIS–Wildlife Services (APHIS–WS) has issued a number of local environmental assessments (EAs) for proposed actions that incorporated legally available methods to manage feral swine damage. These methods currently include technical assistance in which APHIS–WS provides information and recommendations on how to minimize feral swine damage to the requesting public and resource management agencies, and direct control services in which APHIS–WS uses one or more methods such as live corral and cage traps, snares, dogs, and aerial and ground shooting to remove feral swine. APHIS–WS EAs, which include feral swine damage management, are available on the APHIS–WS Web site at [http://www.aphis.usda.gov/regulations/ws/ws\\_nepa\\_environmental\\_documents.shtml#EAs](http://www.aphis.usda.gov/regulations/ws/ws_nepa_environmental_documents.shtml#EAs).

Current efforts to manage problems associated with feral swine damage have helped to alleviate localized damage, but the overall feral swine population and associated damage and disease threats have continued to expand at a much faster rate than local governments and APHIS have been able to address them. We believe that a national, coordinated effort would more effectively address the growing problems associated with feral swine and would result in more efficient delivery of damage management programs to Tribes, States, Territories, individuals, and organizations that request assistance.

The APHIS–WS program is authorized by the Animal Damage Control Act (7 U.S.C. 426) to work with other Federal agencies, Tribes, States, Territories, local governments, and private individuals and organizations to protect American resources from damage associated with wildlife. The APHIS–Veterinary Services (VS) program will be participating in the development of the environmental impact statement (EIS). The APHIS–VS program works in a variety of ways to protect and improve the health, quality, and marketability of U.S. animals, animal products, and veterinary biologics by preventing, controlling, and/or eliminating animal diseases and monitoring and promoting animal health and productivity. The authority for the mission of VS is found in the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*).

Under the provisions of the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), Federal agencies must examine the potential environmental impacts of proposed Federal actions before actions

are taken. In accordance with NEPA, the regulations of the Council on Environmental Quality (CEQ) for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), U.S. Department of Agriculture (USDA) regulations implementing NEPA (7 CFR part 1b), and APHIS' NEPA Implementing Procedures (7 CFR part 372), APHIS has decided to prepare an EIS to review potential alternatives for a national feral swine management strategy. APHIS will be the lead Federal agency in the development of the EIS in cooperation with other Federal, State, and Tribal entities that have jurisdiction by law and expertise and share a common interest in reducing or eliminating problems caused by feral swine.

Several Federal agencies and national organizations have been invited to formally cooperate in the development of the EIS. States and Territories will also be contacted for input and all federally recognized Tribes will be provided an opportunity for consultation and participation. By preparing an EIS at this time, APHIS may provide other Federal agencies with an opportunity to adopt all or part of the EIS for future actions in accordance with the adoption provisions of the CEQ's NEPA implementing regulations (40 CFR 1506.3).

#### Proposed Action

APHIS is proposing to implement a nationally coordinated swine damage management program in cooperation with Tribes, agencies, and organizations at the State level to accommodate varying local laws and management objectives for feral swine. Program activities would be implemented in all or most States and Territories where feral swine occur. In States where feral swine are an infrequent occurrence or populations are low, APHIS proposes to cooperate with local and State agencies and Tribes to implement strategies to eliminate feral swine. In areas with established or high swine populations, APHIS would work with Tribes, and State and local agencies and organizations to meet local management objectives, which may include reducing statewide populations or eliminating swine from specific locations. The proposed action would incorporate an integrated approach to feral swine damage management issues using the latest scientific research findings, improvements in management methods and new techniques, and communication and outreach tools to manage feral swine conflicts. Methods that would be evaluated for potential

use and/or recommendation by APHIS may include, but are not limited to, fencing, frightening devices, cage traps, corral traps, drop nets, telemetry to locate pigs, hunting with dogs, shooting from ground or from aircraft, the toxicant sodium nitrite, and public hunting.

#### Scoping

We are requesting public comments to further delineate the scope of alternatives and environmental impacts and issues to be addressed in the analysis. We will be hosting a public meeting to discuss the scope of the EIS on May 23, 2013 (see **DATES** and **ADDRESSES** above). We are particularly interested in receiving comments regarding biological, cultural, or ecological issues that should be addressed in the analysis (see “Environmental Issues for Consideration” below), and we encourage the submission of scientific data, studies, or research to support your comments.

#### Alternatives

The EIS will consider a range of reasonable alternatives that will include the proposed action described above and a “no action” alternative, which can be defined as a continuation of current ongoing management practices (40 CFR 1502.14(d)). Under the no action alternative, current APHIS feral swine damage management actions, as conducted in a number of States, would continue without expansion and national coordination. We welcome additional recommendations for management strategies to be addressed in the EIS.

#### Environmental Issues for Consideration

We have also identified the following potential environmental issues for consideration in the EIS:

- Potential effects on feral swine populations.
- Potential direct or indirect impacts on protected and sensitive species and on non-target animals.
- Potential environmental effects of carcass disposal methods.
- Potential direct or indirect effects on tribal resources and values.
- Potential direct or indirect effects on hunters and others who benefit from feral swine.
- Potential direct or indirect economic effects.
- Potential effects on social values such as ethical perspectives and humaneness.

In considering reasonable alternatives, the EIS will study the effects of the project on these environmental issues.

While the environmental issues evaluated at the local level have not been significant, a decision to implement the proposed action would expand the current program capabilities to a national scale and encourage additional national and local level partnerships to address feral swine conflicts. Comments that identify other issues or alternatives that should be considered in the EIS would be extremely helpful.

After the comment period closes, APHIS will review and consider all comments received during the comment period and any other relevant information in the development of the EIS. All comments received will be available for public review. Upon completion of the draft EIS, a notice announcing its availability and an opportunity to comment will be published in the **Federal Register**.

#### **Parking and Security Procedures for the Public Meeting**

Persons attending the May 23, 2013, meeting in Riverdale, MD, are required to register in advance at [http://www.aphis.usda.gov/wildlife\\_damage/feral\\_swine/index.shtml](http://www.aphis.usda.gov/wildlife_damage/feral_swine/index.shtml) or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

Travel directions to the USDA Center at Riverside are available on the Internet at [http://www.aphis.usda.gov/plant\\_health/general\\_info/directions\\_riverdale.shtml](http://www.aphis.usda.gov/plant_health/general_info/directions_riverdale.shtml). Please note that a fee of \$5 is required to enter the parking lot at the USDA Center at Riverside. The machine accepts bills and coins as well as credit and debit transactions. You must display your daily parking receipt and have it visible in your vehicle for parking attendants to recognize. Upon entering the building, visitors should inform security personnel that they are attending the feral swine damage management public meeting. Photo identification is required to gain access to the building, and all bags will be screened.

For individuals who are unable to attend the meeting in person, it will be streamed on the Internet as a live Webcast. Information about how to join the live Webcast and conference line will be made available at [http://www.aphis.usda.gov/wildlife\\_damage/feral\\_swine/index.shtml](http://www.aphis.usda.gov/wildlife_damage/feral_swine/index.shtml). We recommend that you connect at least 5 minutes prior to the start of the meeting.

Done in Washington, DC, this 8th day of May 2013.

## **DEPARTMENT OF HEALTH AND HUMAN SERVICES**

### **Food and Drug Administration**

[Docket No. FDA-2013-N-0494]

#### **Draft Interagency Risk Assessment—*Listeria monocytogenes* in Retail Delicatessens: Notice of Availability of Documents and Request for Comment**

**AGENCY:** Food Safety and Inspection Service, United States Department of Agriculture; Center for Food Safety and Applied Nutrition, Food and Drug Administration, HHS.

**ACTION:** Notice and request for comment.

**SUMMARY:** The United States Department of Agriculture (USDA)/Food Safety and Inspection Service (FSIS) and the Food and Drug Administration (FDA)/Center for Food Safety and Applied Nutrition (CFSAN) are announcing the availability of the draft “Interagency Risk Assessment—*Listeria monocytogenes* in Retail Delicatessens.” This draft quantitative risk assessment (QRA) includes an Interpretive Summary and a Technical Report. The purpose of the draft QRA is to evaluate the conditions, such as *Listeria (L.) monocytogenes* contamination of certain ready-to-eat (RTE) foods, for example cheese, deli meats, and deli salads; in the retail deli environment; in niches (a harborage site); or on incoming RTE foods, that contribute to cross-contamination and ultimately, to the risk of listeriosis. The draft QRA makes it possible to evaluate the effectiveness of some retail practices and intervention strategies in reducing the predicted risk of listeriosis from some RTE foods that are sliced, packaged, or prepared in retail delicatessens and consumed in the home.

**DATES:** Comments on the draft QRA should be submitted on or before July 12, 2013.

**ADDRESSES:** Comments to FSIS may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This Web site provides the ability to type short comments directly into the comment field on this Web page or attach a file for lengthier comments. Go to <http://www.regulations.gov>. Follow the on-line instructions at that site for submitting comments.

- *Mail, including CD-ROMs, etc.:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, Patriots Plaza 3, 1400 Independence Avenue SW., Mailstop 3782, Room 8-163A, Washington, DC 20250-3700.

- *Hand- or Courier-Delivered Submittals:* Deliver to Patriots Plaza 3, 355 E Street SW., Room 8-163A, Washington, DC 20250-3700.

*Instructions:* All items submitted by mail or electronic mail must include the Agency name and docket number FSIS-2013-0019. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to <http://www.regulations.gov>.

*Docket:* For access to background documents or comments received, go to the FSIS Docket Room at Patriots Plaza 3, 355 E Street SW., Room 8-164, Washington, DC 20250-3700 between 8:00 a.m. and 4:30 p.m., Monday through Friday.

*Comments to FDA:* Interested persons may submit either electronic comments and scientific data and information to <http://www.regulations.gov> or written comments and scientific data and information to the Division of Dockets Management [(HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852]. It is only necessary to send one set of comments. Identify comments with the FDA docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at <http://www.regulations.gov>.

**FOR FURTHER INFORMATION CONTACT:** FSIS: Janell Kause, Scientific Advisor for Risk Assessment, Office of Public Health Science, Food and Safety Inspection Service, USDA, 355 E Street SW., Washington, DC 20024; Telephone: (202) 690-0286, Email: [Janell.Kause@fsis.usda.gov](mailto:Janell.Kause@fsis.usda.gov).

FDA: Sherri Dennis, Acting Director, Division of Risk Assessment, Office of Analytics and Outreach, FDA/CFSAN, HFS-005, 5100 Paint Branch Parkway, College Park, Maryland 20740;
