

Resources for Emotion and Social skill promotion (CARES) project is an evaluation of three social emotional program enhancements within Head Start settings serving three- and four-year-old children. This project focuses on identifying the central features of effective programs to provide the information federal policy makers and Head Start providers will need if they are to increase Head Start's capacity to improve the social and emotional skills and school readiness of preschool age children. The Head Start CARES project

completed data collection for cohort (1) 4-year-olds and cohort (2) 3-year-olds in spring of 2011, and for cohort (2) 4-year-olds in the spring of 2013.

ACF is proposing to collect information necessary to identify Head Start CARES study respondents' current location and follow-up with respondents until the children reach third grade. In support of the examination of fourth grade outcomes, information must be collected from parents or guardians until the third grade year. Therefore, in the summer of 2013 and spring of 2014 tracking of all

children will be necessary, in the spring of 2015 for the three- and four-year-olds in Cohort 2 only, and in the spring of 2016 the three-year-olds in Cohort 2 only. In addition to location and contact information, a small set of additional items will provide information on the parents' perception of the children's social and emotional skills and behavioral outcomes.

Respondents: Low-income parents and their Head Start children. This is a three-year information collection request.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, the Administration for Community Living (Formerly the Administration for Aging) has submitted the following proposed collection of information to OMB for review and clearance. The data collection associated with the

Evaluation of the Elderly Nutrition Services Program (ENSP) is necessary to meet three broad objectives of ACL: (1) To provide information to support program planning, including an analysis of program processes, (2) to develop information about program efficiency and cost issues, and (3) to assess program effectiveness, as measured by the program's effects on a variety of important outcomes, including nutrient adequacy, socialization opportunities, health outcomes, and, ultimately, helping elderly people avoid institutionalization.

In response to the 60-day **Federal Register** notice related to this proposed data collection and published on April 5, 2012, no relevant comments were received. The proposed data collection tools and participant recruitment materials may be found on the AoA Web site: http://www.aoa.gov/AoARoot/Program_Results/ENSP/Index.aspx. ACL estimates the burden of this collection of information as follows 3,750 hours for individuals, 1,672 for local agencies (AAAs and LSPs) and 94.08 hours for State Units on Aging (SUAs) and 463 hours for organizations—Total Burden for Study 5,516.08 hours.

Dated: May 8, 2013.

Kathy Greenlee,

Administrator and Assistant Secretary for Aging.
