**SUPPLEMENTARY INFORMATION:** Under the  
 Virus-Serum-Toxin Act (21 U.S.C. 151  
*et seq.*), a veterinary biological product  
 must be shown to be pure, safe, potent,  
 and efficacious before a veterinary  
 biological product license may be  
 issued. A field test is generally  
 necessary to satisfy prelicensing  
 requirements for veterinary biological  
 products. Prior to conducting a field test  
 on an unlicensed product, an applicant  
 must obtain approval from the Animal  
 and Plant Health Inspection Service  
 (APHIS), as well as obtain APHIS'  
 authorization to ship the product for  
 field testing.

To determine whether to authorize  
 shipment and grant approval for the  
 field testing of the unlicensed product  
 referenced in this notice, APHIS  
 considers the potential effects of this  
 product on the safety of animals, public  
 health, and the environment. Using the  
 risk analysis and other relevant data,  
 APHIS has prepared an environmental  
 assessment (EA) concerning the field  
 testing of the following unlicensed  
 veterinary biological product:

*Requester:* Merial, Inc.

*Product:* Canine Lymphoma Vaccine,  
 DNA.

*Possible Field Test Locations:*

Arizona, Florida, Georgia, New York,  
 North Carolina, Tennessee, and Texas.

The above-mentioned product is a  
 replication-incompetent DNA vaccine  
 consisting of a plasmid vector with an  
 inserted therapeutic gene. The vaccine

is intended for the therapeutic  
 immunization of dogs diagnosed with B-  
 cell lymphoma concurrent with or  
 following chemotherapy.

The EA has been prepared in  
 accordance with: (1) The National  
 Environmental Policy Act of 1969  
 (NEPA), as amended (42 U.S.C. 4321 *et*  
*seq.*), (2) regulations of the Council on  
 Environmental Quality for  
 implementing the procedural provisions  
 of NEPA (40 CFR parts 1500-1508), (3)  
 USDA regulations implementing NEPA  
 (7 CFR part 1b), and (4) APHIS' NEPA  
 Implementing Procedures (7 CFR part  
 372).

Unless substantial issues with adverse  
 environmental impacts are raised in  
 response to this notice, APHIS intends  
 to issue a finding of no significant  
 impact (FONSI) based on the EA and  
 authorize shipment of the above product  
 for the initiation of field tests following  
 the close of the comment period for this  
 notice.

Because the issues raised by field  
 testing and by issuance of a license are  
 identical, APHIS has concluded that the  
 EA that is generated for field testing  
 would also be applicable to the  
 proposed licensing action. Provided that  
 the field test data support the  
 conclusions of the original EA and the  
 issuance of a FONSI, APHIS does not  
 intend to issue a separate EA and FONSI  
 to support the issuance of the product  
 license, and would determine that an  
 environmental impact statement need  
 not be prepared. APHIS intends to issue  
 a veterinary biological product license  
 for this vaccine following completion of  
 the field test provided no adverse  
 impacts on the human environment are  
 identified and provided the product  
 meets all other requirements for  
 licensing.

Based on our analysis of the comments received, we have made changes to the preliminary results which are discussed below. The final weighted-average dumping margins are listed below in the section titled "Final Results of Review."

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

Since the preliminary results, the following events have taken place. The Department received timely case briefs from Mitsubishi Polyester Film, Inc., SKC, Inc., and Toray Plastics (America), Inc. (collectively, Petitioners) and JBF on January 14, 2013. Petitioners filed a timely rebuttal brief with the Department on January 22, 2013.

On March 8, 2013, the Department released a post-preliminary analysis memorandum of JBF which addressed Petitioners' targeted dumping allegation.<sup>2</sup> At that time, we invited interested parties to comment on the Post-Preliminary Analysis.<sup>3</sup> JBF submitted comments on the Post-Preliminary Analysis on March 18, 2013, and Petitioners submitted rebuttal comments on March 25, 2013.

##### **Period of Review**

The period of review is November 1, 2010, through October 31, 2011.

##### **Scope of the Order**

The products covered by the order are all gauges of raw, pre-treated, or primed polyethylene terephthalate film (PET Film), whether extruded or co-extruded. Excluded are metallized films and other finished films that have had at least one of their surfaces modified by the application of a performance-enhancing resinous or inorganic layer more than 0.00001 inches thick.
