To mitigate for the construction of the seawall and bridge abutments, the permittee would be required to develop an additional mitigation plan and install 20 shallow-water fish spawning structures in consultation with the Alabama Department of Conservation and Natural Resources. The vehicular bridge would allow the permittee to construct portions of a residential development on the island, which is owned by the permittee and located outside of the project boundary. The proposed boat docks would serve residents of the development whose lots are located on the island as well as off-water lots.
