

- Narrow width of the existing pier inhibits efficient visitor and cargo circulation;

- Frequent maintenance required to the pier access road, which threatens to expose or damage sensitive resources;
- The existing temporary pier is reaching the end of its anticipated lifespan.

The objectives of the proposed pier replacement project include:

- Improving navigational access;
- Improving access and circulation for passengers, cargo, and park operations;
- Protecting marine and terrestrial environments;
- Preserving archaeological resources;
- Preserving and enhancing the historic character of the area.

To meet the purpose, need, and objectives, two preliminary alternatives identified thus far include replacing the pier in its existing location, and replacing the pier at a location approximately 150 feet to the south. If the pier is replaced in its present location, this would include some shoreline armoring to protect the pier access road. If a new pier is constructed to the south, the pier would span the beach and shoreline, and it would require only a short access road with a small amount of scour protection. In either location, the new pier will need to be longer and higher than the existing pier to facilitate safer vessel mooring in deeper water.

Comments and Public Scoping: The purpose of the scoping phase is to elicit comments from interested individuals, organizations, and agencies about issues and concerns about the proposed project in order to inform the development of the Draft EIS. Public scoping meetings are tentatively scheduled for late Spring or Summer 2013 in Ventura and Santa Barbara counties. Concurrent with the publishing of this Notice of Intent in the **Federal Register**, the confirmed dates, times, and locations of the scoping meetings will be publicized through local and regional news media and via the project Web site <http://www.nps.gov/chis/parkmgmt/scorpion-pier-replacement.htm>. The project Web site will be periodically updated, and provides relevant information, including the project description, current information about the EIS process, meeting notices, reports and documents, and useful links associated with the project.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may

be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Decision Process: At this time, it is anticipated that the Draft EIS will be available for public review during Winter 2013. Availability of the Draft EIS for review will be formally announced in the **Federal Register**, through local and regional news media, and via the project Web site. Public meetings will be held after the Draft EIS is distributed to provide further opportunities to comment on the document. The Final EIS is anticipated to be completed in 2014. Because this is a delegated EIS, the official responsible for the final decision regarding the proposed pier replacement is the Regional Director, Pacific West Region. Subsequently, the official responsible for implementation of the approved project will be the Channel Islands National Park.

Dated: March 15, 2013.

Christine S. Lehnertz,

Regional Director, Pacific West Region.
