

(iii) It is demonstrated that an appropriate effort is being made to evaluate, commercialize, and secure national regulatory approval of alternatives and substitutes, taking into consideration the circumstances of the particular nomination . . . Non-Article 5 Parties [e.g., developed countries, including the U.S.] must demonstrate that research programs are in place to develop and deploy alternatives and substitutes. . . .

The term “significant market disruption” is left to the discretion of each Party to the Protocol to interpret. EPA’s interpretation of this term has several dimensions, including looking at potential effects on both demand and supply for a commodity, evaluating potential losses at both an individual level and at an aggregate level, and evaluating potential losses in both relative and absolute terms. EPA refers readers to the preamble for the 2006 CUE rule (71 FR 5989) as well as to the memo in the docket titled “Development of 2003 Nomination for a Critical Use Exemption for Methyl Bromide for the United States of America” for further elaboration.

C. What is the timing for applications for the 2015 control period?

There is both a domestic and international component to the critical use exemption process. The projected timeline for the process for the 2016 critical use exemption is below. A more detailed schedule is on EPA’s Web site at <http://www.epa.gov/ozone/mbr/cueinfo.html>.

May 31, 2013: Solicit applications for the methyl bromide critical use exemption for 2016.

August 29, 2013: Deadline for submitting critical use exemption applications to EPA.

Fall 2013: U.S. Government (EPA, Department of State, U.S. Department of Agriculture, and other interested Federal agencies) prepares U.S. Critical Use Nomination package.

January 24, 2014: Deadline for U.S. Government to submit U.S. nomination package to the Protocol Parties.

Early 2014: Technical and Economic Assessment Panel (TEAP) and Methyl Bromide Technical Options Committee (MBTOC) review the nominations for critical use exemptions.

Mid 2014: Parties consider TEAP/MBTOC recommendations.

November 2014: Parties decide whether to authorize critical use exemptions for methyl bromide for production and consumption in 2016.

Mid 2015: EPA publishes proposed rule for allocating critical use exemptions in the U.S. for 2016.

Late 2015: EPA publishes final rule allocating critical use exemptions in the U.S. for 2016.

January 1, 2016: Critical use exemption permits the limited production and import of methyl bromide for specified uses for the 2016 control period.

Authority: 42 U.S.C. 7414, 7601, 7671–7671q.

Dated: May 16, 2013.
