FEDERAL COMMUNICATIONS COMMISSION

[DA 13-618]

Limitations on the Filing and Processing of Full Power and Class A **Television Station Modification** Applications and Reminder of the Spectrum Act's Preservation Mandate

AGENCY: Federal Communications Commission. ACTION: Notice.

SUMMARY: This document announces an immediate limitation on the filing and processing of full power and class A television station modification applications and also reminds television broadcast stations of the Spectrum Act's Preservation Mandate. See Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112–96, Title VI, 125 Stat. 156 (2012) ("Spectrum Act"). This action will facilitate Commission analysis of repacking methodologies and assure that the objectives of the broadcast television incentive auction, as mandated by the Spectrum Act, are not frustrated. See Spectrum Act at Section 6403(b)(2).

DATES: This filing and processing limitation become effective on April 5, 2013.

FOR FURTHER INFORMATION CONTACT:

Barbara Kreisman, Chief, Video Division, Media Bureau, Federal Communications Commission, barbara.kreisman@fcc.gov, (202) 418-1600.

SUPPLEMENTARY INFORMATION:

I. Limitations on the Filing and Processing of Modification Applications: Beginning immediately, and until further notice, the Media Bureau will not accept for filing modification applications (or amendments to pending modification applications) by full power and Class A television broadcast licensees and permittees for changes to existing television service areas that would increase a full power station's noiselimited contour or a Class A station's protected contour in one or more directions beyond the area resulting from the station's present parameters as represented in its authorizations

(license and/or construction permit).¹ Similarly, the Media Bureau will not accept Class A displacement applications that would increase the station's protected contour. However, consistent with the Commission's proposal in the Notice of Proposed Rulemaking, 77 FR 69933 (Nov. 21, 2012),² Class A minor change applications to implement the digital transition (flash cut and digital companion channel) may continue to be filed and will be processed subject to the current limitations in Sections 73.3572(a)(2) and 74.787(a)(2) of the Commission's rules.

The Bureau will consider, on a caseby-case basis, requests for waiver of the filing limitation imposed by this public notice when a modification application is necessary or otherwise in the public interest for technical or other reasons to maintain quality service to the public, such as when zoning restrictions preclude tower construction at a particular site or when unforeseen events, such as extreme weather events or other extraordinary circumstances, require relocation to a new tower site. As with any request for waiver of our rules, such a request will be granted only on a showing of good cause and when grant of the waiver will serve the public interest.

With respect to pending full power and Class A modification applications, we will process those applications that do not increase the full power station's noise-limited contour or the Class A station's protected contour in one or more directions beyond the area resulting from the station's present parameters as represented in its authorizations (license and/or construction permit). Applicants at variance with this limitation may amend their applications within 60 days of the Public Notice to comply with this limitation or request a waiver. Pending applications that are not amended consistent with this public notice will be processed after the Commission's release of a Report and Order in the Incentive Auction rulemaking

¹ See 47 CFR 73.622(e)(1) (defining "service area" of a full power TV broadcast station). As to Class A stations, protected contour is consistent with the proposed interpretation of the statutory term 'coverage area" in the NPRM. See Expanding the Economic and Innovative Opportunities of Spectrum Through Incentive Auctions, Docket No. 12–268, Notice of Proposed Rulemaking, 27 FCC Rcd 12357, 12390, para. 99 (2012) ("NPRM").

² Id. at 12397, para. 115 ("We do propose to protect in the repacking process certain digital Class A facilities that were not licensed as of February 22, 2012.").
