SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is amending its regulations in chapter I of Title 10 of the *Code of Federal Regulations* (10 CFR) to make miscellaneous corrections. These changes include revising the name of its human capital office, correcting and adding missing cross-references, correcting grammatical errors, revising language for clarity and consistency, and specifying metric units. This document is necessary to inform the public of these non-substantive changes to the NRC's regulations.

II. Summary of Changes

10 CFR Part 1

Correct Office Title. The organizational name of the NRC's human capital office is changed from "Office of Human Resources" to "Office of the Chief Human Capital Officer," wherever it appears in 10 CFR part 1.

10 CFR Part 2

Correct Reference. In § 2.311(b), the reference to § 2.341(c)(2) is incorrect. In this paragraph, the reference "§ 2.341(c)(2)" is replaced with the reference "§ 2.341(c)(3)."

Revise Language for Consistency. Section 2.346(e) is identical to 2.346(f) due to an error from the last revision to this section. The rule text is revised for consistency with the change intended from that rulemaking. The

Commission's recent update to its rules of practice and procedure intended to authorize the Secretary to extend the time for the Commission to rule on a petition for review under § 2.341, and did not intend to create an identical provision to § 2.346(f). (77 FR 46576-46578, 46584; August 3, 2012). This change implements the intended revision to the language to maintain the authority of the Secretary to extend the time for the Commission to rule on a petition for review under § 2.341 and to remove the reference in the rule to § 2.311.

10 CFR Part 40

Correct Reference. In § 40.36(e)(2), the references to "Appendix C to this part," "Appendix D to this part," and "Appendix E to this part" are incorrect. In this paragraph, the references to these appendices should be replaced with references to "Appendix C to part 30 of this chapter," "Appendix D to part 30 of this chapter," and "Appendix E to part 30 of this chapter."

10 CFR Part 50

Revise Language for Clarity. In § 50.47(d), the phrase "rated power" is revised to read, "rated thermal power" is added for clarity and consistency with 10 CFR 50.54(gg)(1).

In appendix E to 10 CFR part 50, section IV, paragraph F.2.a.(i), the phrase "rated power" is revised to read "rated thermal power" for clarity and consistency with 10 CFR 50.54(gg)(1).

Insert Missing References. In § 50.54, the reference to paragraphs (q) and (hh) are inserted to provide a complete list of provisions.

Correct Reference. In § 50.55(e)(4)(i), the reference to "(e)(10)" is incorrect. In this paragraph, the reference "(e)(10)" is replaced with the reference "(e)(4)(v)."

In § 50.55(e)(4)(iii), the references to "(e)(3)(ii)(C)" and "(4)(v)" are incorrect. In this paragraph, the reference "(e)(3)(ii)(C)" is replaced with reference "(e)(3)(iii)(C)" and the reference "(4)(v)" is replaced with reference "(e)(4)(v)."

In § 50.55(e)(6), the reference to "(e)(9)(ii)" is incorrect. In this paragraph, the reference "(e)(9)(ii)" is replaced with the reference "(e)(5)(ii)."

In appendix G to 10 CFR part 50, section IV, the reference to "Table 3" is incorrect. In this section the references to "Table 3" are replaced with the references to "Table 1."

10 CFR Part 51

Revise Language for Clarity. In § 51.22(c)(9), the word “grants” is replaced by “issuance” to maintain conformity with the language concerning “issuance of an amendment” and because a “grant” of an exemption request is not subordinate to or part of the preceding “issuance of an amendment” language. The phrase “the issuance of an amendment to a permit or license for a reactor under part 50 or part 52 of this chapter,” is added to clarify that the exemption issuances covered by this categorical exclusion apply only to exemptions from requirements concerning the installation or use of a facility component located within the 10 CFR part 20 defined restricted area. The § 51.22(c)(9) categorical exclusion does not apply to issuances of exemptions from inspection or surveillance requirements. Issuances of exemptions from inspection or surveillance requirements are covered by the categorical exclusion set forth in § 51.22(c)(25)(vi)(C). The use of semicolons and changing “which” to “that” further clarifies the provision.

10 CFR Part 52

Correct Reference. In § 52.17(b)(2)(i), the reference to “Department of Homeland Security (DHS)” is replaced with the reference “Federal Emergency Management Agency (FEMA).”

Correct Reference. In § 52.17(b)(2)(ii), the reference to “DHS” is replaced with the reference “FEMA.”

Correct Reference. In § 52.18, the reference to “DHS” is replaced with “Federal Emergency Management Agency.”

Revise Language for Clarity. In § 52.79(b)(4), the phrase, “decrease in effectiveness” is revised to read “reduction in effectiveness,” for clarity and consistency with § 50.54(q)(iv).

Insert Missing Reference. In § 52.163, the reference to subpart E is inserted to provide a complete list of referenced hearing procedures.

10 CFR Part 70

Correct Reference. In § 70.25(f)(2), the references to “Appendix A to this part,” “Appendix C to this part,” “Appendix D to this part,” and “Appendix E to this part,” are incorrect. In this paragraph, the references to these appendices should be replaced with references to “appendix A to part 30 of this chapter,” “appendix C to part 30 of this chapter,” “appendix D to part 30 of this chapter,” and “appendix E to part 30 of this chapter.”

10 CFR Part 73

Correct Grammatical Error. In § 73.6, paragraph (a) is revised to replace the colon at the end of the sentence with a period. Paragraph (b), is revised to replace the semicolon and the word “and” at the end of the sentence with a period. These grammatical errors are being corrected to clarify that the criteria in paragraphs (a) and (b) are to be treated as independent criteria as intended in the Atomic Energy Commission’s February 1, 1973 (38 FR 3082), final rule.

Adding Metric Units. In § 73.6(b), metric units are added for the external radiation level, “1 Gray (100 Rad),” and distance, “1 meter (3.3 feet),” to meet agency policy of using dual units.

10 CFR Part 100

Revise Language for Clarity. In § 100.20(b) and § 100.21(d) and (e), the term “site parameter” is revised to read, “site characteristics” for clarity and consistency with 10 CFR part 52.

Correct Reference. In appendix A to 10 CFR part 100, section II, the reference to § 50.10(c)(1) is no longer correct. In this sentence the reference “50.10(c)(1)” is replaced with the reference “50.10(a)(2)(ii).”

III. Rulemaking Procedure

Under the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive the normal notice and comment requirements if it finds, for good cause, that they are impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on the amendments because they will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections related only to management, organization, procedure, and practice. Specifically, the revisions are of the following types: Revision of the name for an NRC office; correction and insertion of cross-references to sections of 10 CFR chapter I; correction of grammatical errors; specification of metric units; and revision to provide clarity and consistency. These amendments do not require action by any person or entity regulated by the NRC. Also, the final rule does not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR

51.22(c)(2), which excludes from a major action rules which are corrective or of minor nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

V. Paperwork Reduction Act Statement

This final rule does not contain information collection requirements and, therefore, is not subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget control number.

VI. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31883).

VII. Backfitting and Issue Finality

The NRC has determined that the administrative changes in this final rule do not constitute backfitting, and therefore a backfit analysis is not included. The revisions are administrative in nature, including revision of the name for an NRC office; correction and insertion of cross-references to sections of 10 CFR Chapter I; correction of grammatical errors; specification of metric units; and revisions to provide clarity and consistency. They impose no new requirements and make no substantive changes to the regulations. The revisions do not involve any provisions that would impose backfits as defined in 10 CFR chapter I, or would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of the rule in final form would not constitute backfitting. Therefore, a backfit analysis was not prepared.

* * * * *

IV. * * *
A. * * *
2. * * *

a. Pressure-temperature limits and minimum temperature requirements for the reactor vessel are given in table 1, and are defined by the operating condition (i.e., hydrostatic pressure and leak tests, or normal operation including anticipated operational

occurrences), the vessel pressure, whether or not fuel is in the vessel, and whether the core is critical. In table 1, the vessel pressure is defined as a percentage of the preservice system hydrostatic test pressure. The appropriate requirements on both the pressure-temperature limits and the minimum permissible temperature must be met for all conditions.

b. The pressure-temperature limits identified as "ASME Appendix G limits" in table 1 require that the limits must be at least as conservative as limits obtained by following the methods of analysis and the margins of safety of Appendix G of Section XI of the ASME Code.

c. The minimum temperature requirements given in table 1 pertain to the controlling material, which is either the material in the closure flange of the material in the beltline region with the highest reference temperature. As specified in table 1, the minimum temperature requirements and the controlling material depend on the operating condition (i.e., hydrostatic pressure and leak tests, or normal operation including anticipated operational occurrences), the vessel pressure, whether fuel is in the vessel, and whether the core is critical. The metal temperature of the controlling material, in the region of the controlling material which has the least favorable combination of stress and temperature must exceed the appropriate minimum temperature requirement for the condition and pressure of the vessel specified in table 1.
