

project area. About three miles of these roads are needed to haul timber from the sale area and for future management of the national forest. These roads would be added to the Bitterroot National Forest System of Roads database and closed until needed for forest management. The remaining three miles of undetermined roads not needed for future national forest management would be obliterated by full or partial recontouring.

Possible Alternatives

Two alternatives to the proposed action have been identified. One alternative would treat units that are accessible with the existing road system. No new system roads or temporary roads would be constructed and tracked line machine trail would not be developed. The second alternative to the proposed action would address potential conflicts by focusing on forest plan objectives for wildlife habitat and visual quality in management areas 2, 3a, 3b, and 3c.

Another alternative that would not require any forest plan amendments was considered. It will not be carried through the analysis because existing conditions in the project area do not meet forest plan standards and there are no management actions that can create conditions to meet forest plan standards.

Responsible Official

Julie K. King, Bitterroot National Forest Supervisor, 1801 N. First, Hamilton, Montana 59840-3114.

Nature of Decision To Be Made

The Responsible Official will select the proposed action, an alternative to the proposed action (including the no action alternative), or modify the proposed action or alternatives to the proposed action. The decision may include amendments to the Bitterroot National Forest Plan standards for coarse woody debris, visual quality objectives, old growth, and thermal and hiding cover.

Preliminary Issues

Scoping was initiated in November 2010 and restarted in February 2013. Issues identified through these scoping processes include: (1) Road management; (2) balancing forest management practices with recreation, visual quality, wildlife, fisheries, hydrology, and fire management; (3) economics of timber harvest; and (4) the effects and costs of obliterating roads.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however, anonymous comments will not provide the Agency with the ability to provide the respondent with subsequent environmental documents.

Dated: June 3, 2013.

Forest Supervisor.

AGENCY: Forest Service, USDA.

ACTION: Corrected notice of intent to prepare an environmental impact statement; correction.

SUMMARY: A Notice of Intent (NOI) to prepare an Environmental Impact Statement for the Saddle Lakes Timber Sale project was published in the **Federal Register** (77 FR 27013) on May 8, 2012. Due to the length of time that has passed since the first NOI was published, and changes in the dates that the Draft and Final Environmental Impact Statements are expected, the Tongass National Forest is publishing this Corrected NOI. Additionally, the United States Department of Agriculture published a final rule in the **Federal Register** (78 FR 18481-18504) on March 27, 2013 to establish a new process by which the public may file objections seeking predecisional administrative review of proposed projects and activities implementing land management plans documented with a Record of Decision or Decision Notice

(reference 36 CFR part 218). This new process replaces the administrative appeals process at 36 CFR part 215. As the Record of Decision for the Saddle Lakes project is not expected until after September 27, 2013, the Saddle Lakes project is now subject to these new predecisional administrative review procedures.

Scoping Process: Forest Service regulations at 36 CFR part 218, Subparts A and B, published March 27, 2013 (78 FR 18481-18504) regarding the project-level predecisional administrative review process applies to projects and activities implementing land management plans that are not authorized under the Healthy Forest Restoration Act. This proposed project is subject to 36 CFR part 218.
