#### History and Description of the Remains

In April 1958, human remains representing, at minimum, one individual (9W011-9W012) were uncovered by the property owner, Kermit Day, while turning over his garden in Melvindale, Wayne County, MI. The human remains and associated artifacts were released to the state police for identification. The Wayne County Medical Examiner identified the human remains as being those of a Native American ("Mongoloid") female. The human remains were likely not removed from their primary context due to the partial nature of the burial. The human remains were transferred to the WSU Museum from the Wayne County Medical Examiner's Office in December 1958. No known individuals were identified. The objects removed with the human remains reportedly included a pair of scissors, a hand blown bottle, a scalpel, six silver bracelets, and several hand-hammered chain links. These objects went with the human remains to the Medical Examiner's Office, but they were never accessioned by the WSU Museum. Therefore, no associated funerary objects are present.

In November 1958, human remains representing, at minimum, two individuals (9W016) were recovered by the owner of the Falker Gravel Pit (site 20MB58), in Romeo, Macomb County, MI. The human remains were turned over to the state police for identification. The human remains were transferred to the WSU Museum in December 1958. The human remains consist of 18 long bone fragments, pertaining to two separate individuals. No known individuals were identified. No associated funerary objects are present.

In December 1958, human remains representing, at minimum, one individual (9W009), consisting of an isolated mandible, were transferred to the WSU Museum on permanent loan from the University of Michigan. No
