This is a proposed extension of the ICR, which is currently approved through June 30, 2013. Public comments were previously requested via the **Federal Register** (77 *FR* 63813) on October 17, 2012, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart HH. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities: Oil and natural gas production facilities.

Respondent’s obligation to respond: mandatory (40 CFR part 63, subpart HH).

Estimated number of respondents: 3,735 (total).

Frequency of response: Initially, annually, and semiannually.

Total estimated burden: 46,642 hours (per year). “Burden” is defined at 5 CFR 1320.3(b).

Total estimated cost: \$5,431,638 (per year), which includes \$910,733 annualized capital or operation & maintenance costs.

Changes in the Estimates: This ICR combines the requirements from the existing regulations and the 2012 amendment, which are EPA ICR Numbers 1788.09 and 2440.02,

respectively. The 2012 rule amended title 40, chapter I, part 63 subpart HH to include emission sources for which standards were not previously developed. This results in an increase in the number of affected major sources. The amendment did not affect the number of area sources.

Several changes were made to this ICR: (1) A correction in the estimated number of respondents based on recent data obtained during development of the 2012 rule amendment; (2) Inclusion of requirements associated with the 2012 amendment, including affirmative defense; and (3) Update to labor rates used in calculating burden estimates. The changes result in an overall decrease in the labor hours and costs and an increase in the total capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. The current OMB Inventory adds the burden from EPA ICR Numbers 1788.09 and 2440.02, double-counting the burden associated with several requirements. This ICR has been updated to remove any duplicates and to reflect the revised standard correctly.

Abstract: Under Section 206(a) of the Clean Air Act (42 U.S.C. 7521), on-highway engine and vehicle manufacturers may not legally introduce their products into U.S. commerce unless EPA has certified that their production complies with applicable emission standards. Per section 207(a), original vehicle manufacturers must warrant that vehicles are free from defects in materials and workmanship that would cause the vehicle not to comply with emission regulations during its useful life. Section 207(a) directs EPA to provide certification to those manufacturers or builders of automotive aftermarket parts that demonstrate that the installation and use of their products will not cause failure of the engine or vehicle to comply with emission standards. An aftermarket part is any part offered for sale for installation in or on a motor vehicle after such vehicle has left the vehicle manufacturer's production line (40 CFR 85.2113(b)). Participation in the aftermarket certification program is voluntary. Aftermarket part manufacturers or builders (manufacturers) electing to participate conduct emission and durability testing as described in 40 CFR part 85, subpart V, and submit data about their products and testing procedures. Any information submitted to the Agency for which a claim of confidentiality is made is safeguarded according to policies set forth in CFR title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2).

Form Numbers: None.

Respondents/affected entities: manufacturers or builders of automotive aftermarket parts.

Respondent's obligation to respond: voluntary.

Estimated number of respondents: 1 (total).

Frequency of response: On occasion.

Total estimated burden: 547 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$19,063 (per year), which includes \$1,955 annualized capital or operation & maintenance costs.

Changes in Estimates: There is no change in the total estimated respondent

burden compared with the ICR currently approved by OMB.

Dated: June 5, 2013.
