Agenda: The committee will discuss data submitted by sanofi-aventis U.S., LLC to support a supplemental new drug application (sNDA) 20468/S-035, for the switch from prescription to over-the-counter (OTC) of triamcinolone acetonide nasal spray. The proposed OTC use is "temporarily relieves these symptoms of hay fever or other upper respiratory allergies: Nasal congestion, runny nose, sneezing, itchy nose." The applicant proposes to label the product for OTC use in adults and children. The data to be discussed will include studies addressing the potential adverse effects, as well as a summary of the postmarketing experience with the triamcinolone acetonide nasal spray addressing the potential for both systemic and local effects. The committee will be asked to consider whether the data support the appropriate and safe use of triamcinolone acetonide nasal spray by OTC consumers.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting.
