

the thresholds to become eligible or the dollar value associated with the rebates and, moreover, by eliminating the inclusion of a trading day that would almost certainly lower a Member's ADV as a percentage of average daily TCV, it will make the majority of Members more likely to meet the minimum or higher tier thresholds, which will provide additional incentive to Members to increase their participation on the Exchange in order to meet the next tier. In addition, the Exchange believes that the proposed changes to fees are equitably allocated among Exchange constituents as the methodology for calculating ADV and TCV will apply equally to all Members. While, although unlikely, certain Members may have a higher ADV as a percentage of average daily TCV with the day included, the proposal will make June trading rebates more similar to other months as well as to make all Members' cost of trading on the Exchange more predictable, regardless of how the proposal affects their ADV as a percentage of average daily TCV, which in turn will preserve Members' incentives to participate in trading on the Exchange in a manner intended to be incented by the Exchange's fee schedule.

Volume-based tiers such as the liquidity adding tiers maintained by the Exchange have been widely adopted in the equities markets, and are equitable and not unfairly discriminatory because they are open to all members on an equal basis and provide rebates that are reasonably related to the value to an exchange's market quality associated with higher levels of market activity, such as higher levels of liquidity provision and introduction of higher volumes of orders into the price and volume discovery process. Accordingly, the Exchange believes that the proposal is equitably allocated and not unfairly discriminatory because it is consistent with the overall goals of enhancing market quality. Further, the Exchange believes that a tiered pricing model not significantly altered by the removal of a single known day of atypical trading behavior, which will allow Members to predictably calculate what the costs associated with their trading activity on the Exchange, is reasonable, fair and equitable and not unreasonably discriminatory because it is uniform in application amongst Members and should enable such participants to operate their business without concern of unpredictable and potentially significant changes in expenses.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes will help the Exchange to continue to incentivize higher levels of liquidity at a tighter spread while providing more stable and predictable costs to its Members. As stated above, the Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee structures to be unreasonable or excessive.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹¹ and paragraph (f) of Rule 19b-4 thereunder.¹² At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.
