National Institutes of Health

Submission for OMB review; 30-day comment request: NLM PEOPLE LOCATOR® System

SUMMARY: Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the **Federal Register** on April 15, 2013, page 22271 and allowed 60-days for public comment. A single comment submission was received which is currently under review for further consideration. The purpose of this notice is to allow an additional 30 days for public comment. The National Library of Medicine (NLM), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Direct Comments to OMB: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, *OIRA_submission@omb.eop.gov* or by fax to 202-395-6974, Attention: NIH Desk Officer.

Comment Due Date: Comments regarding this information collection are best assured of having their full effect if

received within 30-days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments or request more information on the proposed project contact: David Sharlip, NLM Project Clearance Liaison, Office of Administrative and Management Analysis Services, OAMAS, NLM, NIH, Building 38A, Room B2N12, 8600 Rockville Pike, Bethesda, MD 20894, or call non-toll-free number (301) 496-5441, or Email your request, including your address to: *sharlipd@mail.nih.gov*. Formal requests for additional plans and instruments must be requested in writing.

Proposed Collection: NLM People Locator System 0925-0612, Expiration Date: 06/30/2013, Type of submission: Revision, National Library of Medicine (NLM), National Institutes of Health (NIH).

Need and Use of Information Collection: This collection of data is intended to assist in the reunification of family members and friends who are separated during a disaster. Experience in operational drills and during real-world disasters such as the January 2010 earthquakes in Haiti demonstrates that family members and loved ones are often separated during disasters and have significant difficulty determining each other's safety, condition, and location. Reunification can not only improve their emotional well-being during the recovery period, but also improve the chances that injured victims will be cared for once they are released from urgent medical care. Family and friends are also a valuable source of medical information that may be important to the care of injured victims (e.g., by providing family or personal medical history, information about allergies). The National Library of

Medicine (NLM) aims to assist Federal, State and Local agencies in disaster relief efforts and to serve its mission of supporting national efforts to the response to disasters via the PEOPLE LOCATOR® system and related mobile app (ReUnite™) developed as part of the intramural Lost Person Finder (LPF) R&D project. The information collection would support efforts to reunite family and friends who are separated during a disaster. Information about missing ("lost") people would be collected from family members or loved ones who are searching for them. Information about recovered ("found") people could be provided by medical personnel, volunteers and other relief workers assisting in the disaster recovery effort. Information collected about missing and recovered persons would vary including any one of the following and possibly all: a photograph, name (if available for a found person), age group (child, adult) and/or range, gender, status (alive and well, injured, deceased, unknown), and location. The information collection would be voluntary. It would be activated only during times of declared emergencies, training and demonstration support activities, and would operate in declared emergencies until relief efforts have ceased in response to a particular disaster. This data collection is authorized pursuant to sections 301, 307, 465 and 478A of the Public Health Service Act [42 U.S.C. 241, 242l, 286 and 286d]. NLM has in its mission the development and coordination of communication technology to improve the delivery of health services.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 7,500.

ESTIMATED ANNUALIZED BURDEN HOURS

| Types of respondent | Number of respondents | Number of responses per respondent | Average time per response (in hours) | Total annual burden hours |
|--|-----------------------|------------------------------------|--------------------------------------|---------------------------|
| Emergency Care First-Responders, Physicians, Other Health Care Providers | 500 | 100 | 3/60 | 2,500 |
| Family members seeking a missing person | 50,000 | 2 | 3/60 | 5,000 |

Dated: June 19, 2013.

David Sharlip,

Project Clearance Liaison, NLM, NIH.
