SUPPLEMENTARY INFORMATION:

Proposed Project

Medical Expenditure Panel Survey—Insurance Component

Employer-sponsored health insurance is the source of coverage for 78 million current and former workers, plus many of their family members, and is a cornerstone of the U.S. health care system. The Medical Expenditure Panel Survey—Insurance Component (MEPS-IC) measures the extent, cost, and coverage of employer-sponsored health insurance on an annual basis. These statistics are produced at the National, State, and sub-State (metropolitan area) level for private industry. Statistics are also produced for State and Local governments.

This research has the following goals:

(1) To provide data for Federal policymakers evaluating the effects of National and State health care reforms.

(2) To provide descriptive data on the current employer-sponsored health insurance system and data for modeling the differential impacts of proposed health policy initiatives.

(3) To supply critical State and National estimates of health insurance spending for the National Health Accounts and Gross Domestic Product.

This study is being conducted by AHRQ through the Bureau of the Census, pursuant to AHRQ's statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement. 42 U.S.C. 299a(a)(1) and (2).

Method of Collection

To achieve the goals of this project the following data collections for both private sector and state and local government employers will be implemented:

(1) Prescreener Questionnaire—The purpose of the Prescreener Questionnaire, which is collected via telephone, varies depending on the insurance status of the establishment contacted. (Establishment is defined as a single, physical location in the private sector and a governmental unit in state and local governments.) For
