

requests, in order to provide the Commission, information that has been collected in separate databases, each for a different group of services. Such processes have resulted in unreliable reporting, duplicate filings for the same licensees/applicants, and high cost burdens to licensees/applicants. By streamlining the ULS, the Commission eliminates the filing of duplicative applications for wireless carriers; increases the accuracy and reliability of licensing information; and enables all wireless applicants and licensees to file all licensing-related applications and other filings electronically, thus increasing the speed and efficiency of the application process.

The ULS also benefits wireless applicants/licensees by reducing the cost of preparing applications, and speeds up the licensing process in that the Commission can introduce new entrants more quickly into this already competitive industry. Finally, ULS enhances the availability of licensing information to the public which has access to all publicly available wireless information on-line, including maps depicting a licensee's geographic service area.

The purpose of the FCC Form 602 is to obtain the identity of the filer and to elicit information required by Section 1.2112 of the Commission's rules regarding:

(1) Persons or entities holding a 10 percent or greater direct or indirect ownership interest or any general partners in a general partnership holding a direct or indirect ownership interest in the applicant ("Disclosable Interest Holders"); and

(2) All FCC-regulated entities in which the filer or any of its Disclosable Interest Holders owns a 10 percent or greater interest.

The data collected on the FCC Form 602 includes the FCC Registration Number (FRN), which serves as a "common link" for all filings an entity has with the FCC. The Debt Collection Improvement Act of 1996 requires that entities filing with the Commission use a FRN. The FCC Form 602 was designed for, and must be filed electronically by, all licensees that hold licenses in auctionable services.

The information collected on the form is used by the FCC to determine whether the filer is legally, technically and financially qualified to be a licensee. Without such information, the Commission could not determine whether to issue licenses to applicants that provide telecommunications services to the public and fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended.
