## NUCLEAR REGULATORY COMMISSION

### 10 CFR Part 26

[NRC-2009-0225]

RIN 3150-A167

### Revisions to Fitness for Duty Programs' Drug Testing Requirements

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Regulatory basis.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is making available the regulatory basis for the ongoing proposed rulemaking effort to amend its regulations regarding drug testing requirements in NRC licensees' fitness for duty programs. The regulatory basis documents the reasoning upon which the NRC determined rulemaking was the appropriate course of action. In this regulatory basis, the NRC recommends developing a proposed rule that would enhance the ability of NRC licensees to detect and deter drug use and the alignment of the NRC's regulations with select drug testing provisions in the U.S. Department of Health and Human Services' "Mandatory Guidelines for Federal Workplace Drug Testing Programs" issued in 2008.

**DATES:** At this time, the NRC is not soliciting formal public comments on the materials identified in this document. There will be an opportunity for formal public comment on the proposed rule when it is published in the **Federal Register**.

#### Airworthiness Directives; Airbus Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** We propose to adopt a new airworthiness directive (AD) for all Airbus Model A318, A319, A320, and A321 series airplanes. This proposed AD was prompted by a determination that certain special washers used in the retraction jack anchorage fitting bearing installation in the main landing gear (MLG) were incorrectly manufactured. This proposed AD would require an inspection of the left-hand (LH) and right-hand (RH) MLG retraction jack anchorage fitting bearing assemblies to verify that the special washer is seated correctly, and related investigative and corrective actions if necessary. We are proposing this AD to detect and correct
