

Access to electronic files is protected by: (1) Cryptographic protocols for communications over a network; (2) a unique user identification (ID) number; (3) a secure ID authentication token specific to each user and possessing its own encryption; and (4) the direct supervision of the system manager. The system manager has the capability of printing access audit trails for electronic media, thereby permitting regular scheduled and ad hoc monitoring of system access. Access privileges are consistent with the established need-to-know, separation-of-duties and supervisory requirements. Inspector General reports of investigation (ROIs) and investigative files and related records are disseminated only to those U.S. government officials and offices with a clear need-to-know concerning the matter being reported. No secondary distribution of ROIs, investigative files or related records is permitted without the express, written permission of the Inspector General. When it is determined that a user no longer needs access, their user account is disabled.

All users are given cyber security awareness training which covers the procedures for handling Sensitive but Unclassified information, including personally identifiable information (PII). Annual refresher training is mandatory. In addition, all Foreign Service and Civil Service employees and those Locally Engaged Staff who handle PII are required to take the Foreign Service Institute distance learning course, PA 459, instructing employees on privacy and security requirements, including the rules of behavior for handling PII and the potential consequences if it is handled improperly. Before being granted access to OIG Investigation Management System, a user must first be granted access to the Department of State computer system.

Remote access to the Department of State network from non-Department owned systems is authorized only to unclassified systems and only through a Department approved access program. Remote access to the network is configured with the Office of Management and Budget Memorandum M-07-16 security requirements which include but are not limited to two-factor authentication and time out function.
