

simultaneously lodged a proposed Consent Decree with the United States District Court for the District of Colorado in the lawsuit entitled *United States v. Jamesway Cartage, Inc.*, Civil Action No. 1:13-cv-01816. In its Complaint the United States seeks reimbursement of response costs incurred for response actions taken at or in connection with the release or threatened release of hazardous substances at the BioEnergy of Colorado Superfund Site located on 821 West 56th Avenue, City and Adams County, Colorado 80216. BioEnergy of Colorado, LLC, now defunct, operated a bio-diesel production facility at the Site under a lease arrangement with Jamesway Cartage, Inc., the Site owner. EPA removed low pH, caustic materials and methanol used by BioEnergy in the production of bio-fuel that had been spilled, leaked, or abandoned at the Site. Under the settlement Jamesway stipulates to entry of judgment for the full amount of EPA's past response costs, including interest (\$332,801.43), and is required to sell the property within two years and pay 90% of the sales proceeds to satisfy the judgment amount. In return, the United States covenants not to sue or to take administrative action against Settling Defendant pursuant to Section 107(a) of CERCLA, 42 U.S.C. 9607(a), to recover Past Response Costs.

The publication of this notice opens a period for public comment. DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On July 10, 2013, the Department of Justice lodged a proposed consent decree with the United States District Court for the Southern District of Texas in the lawsuit entitled *United States v. Shell Oil Co., et al.*, Civil Action No. 4:13-cv-2009.

In the Complaint, the United States alleges that Shell Oil Co. and two of its affiliated partnerships (“Shell”) violated, at their petroleum refinery and chemical plant in Deer Park, Texas, various provisions of the Clean Air Act, 42 U.S.C. 7401 *et seq.*; the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. 9609(c) and 9613(b); and the Emergency Planning and Community Right-To-Know Act, 42 U.S.C. 11045(b)(3).

Under the consent decree, Shell will implement innovative pollution control technologies to reduce emissions of sulfur dioxide, volatile organic compounds (“VOCs”), and hazardous air pollutants from the twelve flares it operates at its Deer Park facility. Shell has agreed to limit the waste gas it sends to its flares by installing and/or operating systems that will recover and recycle waste gas back into plant processes (*i.e.*, flare gas recovery) and Shell has agreed to an overall “cap” on the volume of waste gas it flares. For waste gas that is flared, Shell will operate numerous monitoring systems and comply with several operating parameters to ensure that the flares adequately combust the gases. In addition, at a cost of between \$15 and \$60 million, Shell will undertake numerous activities at its wastewater treatment plant, its tanks, and its benzene extraction unit to reduce VOC emissions and mitigate the effect of alleged past excess VOC emissions. Shell also will install a \$1 million state-of-the-art monitor at its fenceline to record benzene emissions and make the

results available to the public, as well as spend \$200,000 to retrofit publicly-owned diesel vehicles in the vicinity of the plant to reduce emissions. Finally, Shell will pay a civil penalty of \$2.6 million.

The publication of this notice opens a period of public comment on the consent decree. Comments should be addressed to the Acting Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Shell Oil Co., et al.*, D.J. Ref. No. 90-5-2-1-09388/1. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:
