

exclusions—were intended to apply to every NRC action that substantially changes the expectations of current and future applicants. The exceptions to the general principle are applicable whenever an applicant references a 10 CFR part 52 license (e.g., an early site permit) and/or NRC regulatory approval (e.g., a design certification rule) with specified issue finality provisions. The NRC staff does not, at this time, intend to impose the positions represented in the draft SRP in a manner that is inconsistent with any issue finality provisions. If, in the future, the staff seeks to impose a position in the draft SRP in a manner that does not provide issue finality as described in the applicable issue finality provision, then the staff must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

Dated at Rockville, Maryland, this 27th day of June 2013.

For the Nuclear Regulatory Commission.
Joseph Colaccino,
Chief, Policy Branch, Division of Advanced Reactors and Rulemaking, Office of New Reactors.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2013-0001]

Sunshine Act Meeting

AGENCY HOLDING THE MEETINGS: Nuclear Regulatory Commission.

DATES: Weeks of July 15, 22, 29, August 5, 12, 19, 2013.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Public and Closed.

Week of July 15, 2013

There are no meetings scheduled for the week of July 15, 2013.

Week of July 22, 2013—Tentative

There are no meetings scheduled for the week of July 22, 2013.

Week of July 29, 2013—Tentative

There are no meetings scheduled for the week of July 29, 2013.

Week of August 5, 2013—Tentative

There are no meetings scheduled for the week of August 5, 2013.

Week of August 12, 2013—Tentative

There are no meetings scheduled for the week of August 12, 2013.

Week of August 19, 2013—Tentative

There are no meetings scheduled for the week of August 19, 2013.

NUCLEAR REGULATORY COMMISSION

[NRC-2013-0152]
[EA-13-033; Project No. 0782]

In the Matter of Korea Hydro and Nuclear Power, Co., Ltd. and All Other Persons Who Seek or Obtain Access to Safeguards Information Described Herein; Order Imposing Protection Requirements for Access to Safeguards Information (Effective Immediately)

I

Korea Hydro and Nuclear Power, Co., Ltd. (KHNP) submitted a letter of intent to the U.S. Nuclear Regulatory Commission (NRC) for a design certification (DC) application in 2013.

In June 2009, the Commission published a rulemaking in the **Federal Register** (FR) (74 FR 28112) requiring applicants for a variety of licensing activities, including nuclear power plant designers, to perform a design-specific assessment of the effects of the impact of a large, commercial aircraft and to incorporate design features and functional capabilities into the nuclear power plant design to provide additional inherent protection with reduced use of operator actions. A discussion of the specific requirements for applicants for new nuclear power reactors can be found in Section V of the **Federal Register** notice. To assist designers in completing this assessment, the Commission has decided to provide the detailed aircraft impact characteristics that should be used as reasonable inputs for reactor vendors and architect and engineers who have the need to know and who meet the NRC's requirements for the disclosure of such information to use in the required aircraft impact assessments.

The NRC derived the characteristics from agency analyses performed on operating reactors to support, in part, the development of a broadly effective set of mitigation strategies to combat fires and explosions from a spectrum of hypothetical aircraft impacts. Although the detailed characteristics were not selected as a basis for designing new reactors, the staff is suggesting them as a starting point for aircraft impact assessments. On August 5, 2011, the NRC issued *Regulatory Guide (RG) 1.217, "Guidance for the Assessment of Beyond-Design-Basis Aircraft Impacts,"* (NRC's Agencywide Documents Access and Management System (ADAMS) Accession No. ML092900004), which endorses the methodologies described in the industry guidance document, *Nuclear Energy Institute (NEI) 07-13,*
