SUPPLEMENTARY INFORMATION: DHS established OBIM, formerly the US–VISIT Program, to meet specific legislative mandates intended to strengthen border security, address critical needs in terms of providing decision-makers with critical information, and demonstrate progress toward performance goals for national security, expediting of trade and travel, and supporting immigration system improvements. DHS collects and disseminates biometric information (digital fingerprint images and facial photos) from individuals during their entry into the United States. This information is disseminated to specific DHS Components; other Federal agencies; Federal, state, and local law enforcement agencies; and the Intelligence Community to assist in the decisions they make related to, and in support of, the homeland security mission. Beginning on December 10, 2007, US–VISIT expanded the collection of fingerprints from two prints to ten. The new collection time of 35 seconds, an increase from the previous 15 seconds, is a result of this change, and includes officer instructions. Additionally, DHS published a final rule, entitled “United States Visitor and Immigrant Status Indicator Technology Program (US–VISIT); Enrollment of Additional Aliens in US–VISIT; Authority To Collect Biometric Data From Additional Travelers and Expansion to the 50 Most Highly Trafficked Land Border Ports of Entry,” which became effective on January 18, 2009, and expanded the population of aliens subject to the requirement of having to provide biometrics in connection with their admission to the United States. *See* 73 FR 77473 (Dec. 19, 2008).
