I. Executive Summary

In this final rule, the Pipeline and Hazardous Materials Safety Administration (PHMSA) is amending the Hazardous Materials Regulations (HMR) applicable to the transportation of air bag inflators, air bag modules, and seat-belt pretensioners in § 173.166. This rulemaking is responsive to one petition for rulemaking submitted by an industry representative: P-1523, asking that PHMSA remove unnecessary burdens on the industry that do not advance safety. Further, this final rule is incorporating into the HMR the provisions of two widely used and longstanding special permits with established safety records (DOT-SP 12332 and DOT-SP 13996). These revisions are intended to reduce the regulatory burden on the automotive industry and facilitate commerce, while continuing to maintain an equivalent level of safety.
