SUPPLEMENTARY INFORMATION: This information collection supports safe use of high-voltage continuous mining machines (HVCMM) in underground coal mines by requiring records of testing, examination and maintenance on machines to reduce fire, electrical shock, ignition, and operational hazards. Coal mine supervisors and employees, State mine inspectors, and Federal mine inspectors use the records to document whether mine operators have conducted examinations and tests and have given insight into hazardous conditions encountered or that may be encountered. The records of inspections greatly assist those who use them in making decisions that will ultimately affect the safety of miners working with HVCMM.
