**SUPPLEMENTARY INFORMATION:** Section 303(d) of the Clean Water Act (CWA) requires that each state identify those waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards. For those waters, states are required to establish Total Maximum Daily Loads (TMDLs) according to a priority ranking.

EPA's Water Quality Planning and Management regulations include requirements related to the implementation of Section 303(d) of the CWA (40 CFR 130.7). The regulations require states to identify water quality limited waters still requiring TMDLs every two years. The list of waters still needing TMDLs must also include priority rankings and must identify the waters targeted for TMDL development during the next two years (40 CFR 130.7).

Consistent with EPA's regulations, Louisiana submitted to EPA its 2012 listing decisions under Section 303(d) on February 14, 2013. On May 1, 2013, EPA approved Louisiana's 2012 listing of 323 water body-pollutant combinations and associated priority rankings, and proposed to disapprove Louisiana's decisions not to list three waterbodies. On July 18, 2013, EPA finalized the action to disapprove Louisiana's 2012 listing decisions not to list three water quality limited segments. EPA identified these additional waters and pollutants along with priority rankings for inclusion on the 2012 Section 303(d) List.

Dated: July 18, 2013.
