

not involve the obligation of additional Federal funds. The waiver would allow the Department to issue a continuation award in the amount of \$1,299,827 to FHI 360 for an additional 12-month period, which should ensure that the Center's support of, and collaboration and coordination with, the Federal TA&D centers will not be interrupted.

Any activities to be carried out during the year of the continuation award would have to be consistent with, or be a logical extension of, the scope, goals, and objectives of the grantee's application as approved in the 2008 Technical Assistance Coordination Center competition.

If the proposed waiver and extension of the project period are announced in a final notice in the **Federal Register**, the requirements applicable to continuation awards for this competition, set forth in the June 5, 2008, notice inviting applications, and the requirements in 34 CFR 75.253 would apply to any continuation awards sought by the current Technical Assistance Coordination Center grantee. If we announce the waiver and extension as final, we will base our decisions regarding a continuation award on the program narrative, budget, budget narrative, and program performance report submitted by the current grantee, and the requirements in 34 CFR 75.253.

Regulatory Flexibility Act Certification

The Department certifies that the proposed waiver and extension of the project period would not have a significant economic impact on a substantial number of small entities.

The only entity that would be affected by the proposed waiver and extension of the project period is the current grantee.

The Secretary certifies that the proposed waiver and extension would not have a significant economic impact on this entity because the extension of an existing project imposes minimal compliance costs, and the activities required to support the additional year of funding would not impose additional regulatory burdens or require unnecessary Federal supervision.

Paperwork Reduction Act of 1995

This notice of proposed waiver and extension of the project period does not contain any information collection requirements.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Endangered Species Act, any species that is determined to be endangered or threatened requires critical habitat to be designated, to the maximum extent prudent and determinable. Designations and revisions of critical habitat can be completed only by issuing a rule.

This rule consists of: A proposed rule for designation of critical habitat for *Ivesia webberi*. This rule proposes designation of critical habitat necessary for the conservation of the species. Under this rule, we are proposing to designate a total of 2,011 acres (ac) (814 hectares (ha)) for *Ivesia webberi* within Plumas, Lassen, and Sierra Counties in northeastern California and Washoe and Douglas Counties in northwestern Nevada. We are proposing to list *Ivesia webberi* as a threatened species in a separate rule published elsewhere in today's **Federal Register**.

The basis for our action. Under the Endangered Species Act, any species that is determined to be a threatened or endangered species shall, to the maximum extent prudent and determinable, have habitat designated that is considered to be critical habitat. Section 4(b)(2) of the Act states that the Secretary shall designate and make revisions to critical habitat on the basis of the best available scientific data after taking into consideration the economic impact, national security impact, and any other relevant impact of specifying any particular area as critical habitat. The Secretary may exclude an area from critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying such area as part of the critical habitat, unless he determines, based on the best scientific data available, that the failure to designate such area as critical habitat will result in the extinction of the species.

We are preparing an economic analysis of the proposed designation of critical habitat. In order to consider economic impacts, we are preparing an analysis of the economic impacts of the proposed critical habitat designation and related factors. We will announce the availability of the draft economic analysis as soon as it is completed, at which time we will seek additional public review and comment.

We will seek peer review. We are seeking comments from independent specialists to ensure that our listing proposal is based on scientifically sound data and analyses. We have invited these peer reviewers to comment on our specific assumptions and
