SUPPLEMENTARY INFORMATION:

Information Collection Request Title:

Analyzing Title V Programs in the Context of the Affordable Care Act
OMB No.: 0915-xxxx—New

Abstract: The Affordable Care Act (ACA) will make affordable health coverage available to all legal U.S. residents, as well as guide transformation in the delivery of medicine and public health services. For children, expanded coverage has come about gradually over the past two decades and implementation of major coverage provisions of the ACA in 2014 will result in some shifts in child health coverage.

The Title V Maternal and Child Health (MCH) Block Grant, administered by the Health Resources and Services Administration's Maternal

and Child Health Bureau, provides the foundation for ensuring the health of the nation's mothers, women, children, and youth, including children and youth with special health care needs and their families. Many ACA provisions, like state Medicaid expansions and mandatory health insurance, will change the face of health insurance demand and services provided. In response, State Title V programs will focus on increasing access, equality, and health equity.

A proposed data collection form has been developed to collect health care services budget information from Title V MCH Block Grant recipients to better understand the types of direct services currently provided by Title V MCH programs. This form will request information on expenditures for medical services in addition to data on the individuals served.

Need and Proposed Use of the Information: As children shift between coverage categories as a result of implementation of the ACA, HRSA would like to quantify the impact of these shifts on the federal investment in Title V funding specifically through the federal funds provided via the Title V MCH Block Grant. To do this, HRSA will need to survey states to collect information on whether they use federal Title V MCH Block Grant funds to reimburse health care practitioners who provide services to children and pregnant women.

Likely Respondents: The respondents to the survey will be the Title V Program Directors in the states, the District of Columbia, and Puerto Rico.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.
