SUPPLEMENTARY INFORMATION: The Occupational Employment Statistics (OES) survey is a Federal/State establishment survey of wage and salary workers designed to produce data on current detailed occupational employment and wages for each Metropolitan Statistical Area and Metropolitan Division as well as by detailed industry classification. OES survey data assist in the development of employment and training programs established by the Perkins Vocational Education Act of 1998 and the Workforce Investment Act of 1998. This ICR has been classified as a revision, because the OES Response Analysis Survey has been completed, allowing for its removal from the ICR, and a reduction in the OES sample as a result of the elimination of the Green Goods and Services survey.
