Eliminating Form EIA-5: Quarterly Coal Consumption and Quality Report—Coke Plants

Eliminating Form EIA-5 and the proposed changes to Form EIA-3 will result in the absorption of all 19 EIA-5 respondents into the EIA-3 frame, reduce quarterly maintenance of two separate internet data collection systems with nearly identical layouts and edits, and create a single survey for all non-electric sector coal users.

Eliminating Standby Forms EIA-1: Weekly Coal Monitoring Report—General Industries and Blast Furnaces and EIA-4: Weekly Coal Monitoring Report—Coke Plants

Standby Forms EIA-1 and EIA-4 were intended to collect data from non-electric sector respondents in the event of a coal supply disruption. To date, these forms have never been deployed. Also, the possibility of such a disruption to non-electric sector respondents seems minimal. Eliminating these two survey forms would be optimal.

(5) Estimated Number of Survey Respondents:

- Form EIA-3 will consist of 508 respondents; the increase from the current 489 respondents is because of the additional 19 EIA-5 respondents that will begin reporting on Form EIA-3.
- EIA-7A will consist of 1,208 respondents.
- EIA-8A will consist of 86 respondents.

(6) Annual Estimated Number of Total Responses: 3326.

- Form EIA-3, 2,032 responses.
- EIA-7A, 1,208 respondents.
- EIA-8A, 86 respondents.

(7) Annual Estimated Number of Burden Hours: Total annual burden hours for all three surveys: 3834.

(8) Annual Estimated Reporting and Recordkeeping Cost Burden: EIA estimates that there are no additional costs to respondents associated with the surveys other than the costs associated with the burden hours.
