If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a draft guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide, entitled, "Ultimate Heat Sink for Nuclear Power Plants," is temporarily identified by its task number, DG-1275. The DG-1275 is proposed revision 3 of Regulatory Guide 1.27, dated January 1976.

This regulatory guide describes methods and procedures acceptable to the NRC staff that nuclear power plant facility licensees and applicants may use to implement general design criteria that are applicable to the ultimate heat sink features of plant systems.

American National Standard Institute/American Nuclear Society (ANSI/ANS) Standard 2.21-2012, "Criteria for Assessing Atmospheric Effects on the Ultimate Heat Sink," has been reviewed for applicability to this guide. This ANSI/ANS standard describes atmospheric effects for consideration when designing ultimate heat sinks for safety-related systems at nuclear power plants. Guidance from the ANSI/ANS standard has been incorporated in this guide where appropriate. The NRC staff review of ANSI/ANS 2.21-2012 and DG 1275 criteria for assessing atmospheric effect on the ultimate heat sink is documented and can be found in ADAMS (ML13043A627).
