submissions.¹ We estimated that carriers will require 1.25 hours per application² to compile and analyze the data necessary to disclose the number of third- and fourth-freedom flights conducted within the twelve-month period preceding the filing of an application.

Foreign carriers will also have to provide evidence that their homeland government will afford reciprocity to U.S. carriers seeking authority for the similar fifth-, sixth- and seventhfreedom operations. Carriers may cite certifications submitted by carriers from the same homeland if that homeland issued such certification within the preceding six-month period. Approximately 100 carriers from roughly 30 distinct homelands use OST Form 4540 to apply for statements of authorization annually. We estimate that one foreign carrier from any given homeland will expend roughly 4 hours every six-months to obtain certification from its homeland governments.3 We have apportioned 30 minutes to each application to account for the time required to obtain certifications from homeland governments.

We have no empirical data to indicate how much time is required for a person to complete OST Form 4540; however, anecdotal evidence reveals that respondents spend thirty (30) minutes or less completing the form and brief justification. In some cases, respondents spend a limited amount of time, less than ten (10) minutes, reviewing the form before sending it via facsimile or email to the Department. In the interest of providing a conservative estimate so as to not understate the burden hours, we estimate the hour burden for completing OST Form 4540 as thirty (30) minutes.

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2013-0108]

Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of applications for exemption, request for comments.

SUMMARY: FMCSA announces receipt of applications from 6 individuals for an exemption from the prohibition against persons with a clinical diagnosis of epilepsy or any other condition which is likely to cause a loss of consciousness or any loss of ability to operate a commercial motor vehicle (CMV) from operating CMVs in interstate commerce. The regulation and the associated advisory criteria published in the Code of Federal Regulations as the "Instructions for Performing and Recording Physical Examinations" have resulted in numerous drivers being prohibited from operating CMVs in interstate commerce based on the fact that they have had one or more seizures and are taking anti-seizure medication, rather than an individual analysis of their circumstances by a qualified medical examiner. If granted, the exemptions would enable these individuals who have had one or more seizures and are taking anti-seizure medication to operate CMVs for 2 years in interstate commerce.

DATES: Comments must be received on or before October 16, 2013.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA—2013—0108 using any of the following methods:

 Each submission must include the Agency name and the docket ID for this Notice. Note that DOT posts all

¹ The rule-making associated with the T–100 program can be found on the Federal Docket Management System (FDMS) at http://www.regulations.gov, in Docket DOT–OST–1998–4043. Information regarding burden hours is on file in the Office of Aviation Analysis (X–50).

² The Office of Aviation Analysis (X–50) estimated that small-carriers would require 1 burden hour per report, and large carriers would require 3 burden hours per report to analyze and report T–100 program data. Considering that the data required in this information collection can be derived from data already collected, we have taken an average of the estimated time required, and conservatively shortened the time by 45 minutes because no new data entry will be required.

 $^{^3}$ Calculation: (4 burden hours per application) imes (30 foreign homelands) imes (2 requests per year) = 240 annual burden hours. Apportioning 240 annual burden hours equally among an average of 430 applications annually = approximately 30 burden minutes per application.
