

Sanctuary, but these actions will be addressed under a separate NEPA/CEQA process. We will address activities at other ponds in subsequent phases.

Alternatives

We will consider a range of alternatives and their impacts in the EIS/EIR, including the No Action/No Project Alternative. Scoping will be an early and open process designed to determine the issues and alternatives to be addressed in the EIS/EIR. The range of alternatives may include varying approaches to restoring tidal marshes and enhancing managed ponds, as well as varying levels and means of flood management and recreation and public access components which correspond to the project objectives. The EIS/EIR will identify the anticipated effects of the alternatives (both negative and beneficial) and describe and analyze direct, indirect, and cumulative impacts of each alternative.

NEPA Compliance

This EIS/EIR is a project-level environmental document that is tiered from the 2007 Final EIS/EIR for the SBSP Restoration Project. Information gathered through this scoping process will assist us in developing a reasonable range of alternatives to address the restoration of the Phase 2 salt ponds of the Refuge and collaborative integration with adjacent landowners and operators of public infrastructure. A detailed description of the proposed action and alternatives will be included in the EIS/EIR. For each issue or potential impact identified, the EIS/EIR will include a discussion of the parameters used in evaluating the impacts as well as recommended mitigation, indicating the effectiveness of mitigation measures proposed to be implemented and what, if any, additional measures would be required to reduce the impacts to a less-than-significant level. The EIS/EIR will include an analysis of the restoration, flood management, and recreation and public access components associated with the proposed restoration.

We will conduct environmental review in accordance with the requirements of NEPA, as amended (42 U.S.C. 4321 et seq.), its implementing regulations (40 CFR parts 1500–1508), other applicable regulations, and our procedures for compliance with those regulations. The environmental document will be prepared to meet both the requirements of NEPA and the California Environmental Quality Act (CEQA). The California State Coastal Conservancy is the CEQA lead agency. We anticipate that a draft EIS/EIR will be available for public review early in 2014.

Public Comment

We are furnishing this notice in accordance with section 1501.7 of the NEPA implementing regulations to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the EIS/EIR. We invite written comments from interested parties to ensure identification of the full range of issues.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in you comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Public Scoping Meeting

In addition to providing written comments, the public is encouraged to attend a public scoping meeting on September 24, 2013, to provide us with suggestions and information on the scope of issues and alternatives to consider when drafting the EIS/EIR. The location of the public scoping meeting is provided in the **DATES** section above.

Persons needing reasonable accommodations in order to attend and participate in the public meeting should contact us at the address listed in the **ADDRESSES** section no later than 1 week before the public meeting. Information

regarding the proposed restoration is available in alternative formats upon request. We will accept written comments at the scoping meeting or afterwards.

Regional Director, Pacific Southwest Region.
