

to downtown Los Angeles while maintaining existing levels of flood risk management. Restoration includes creation and reestablishment of historic riparian strand and freshwater marsh habitat to support increased populations of wildlife and enhance habitat connectivity within the study area, as well as to provide opportunities for connectivity to ecological zones such as the Santa Monica Mountains, Verdugo Hills, Elysian Hills, and San Gabriel Mountains. Restoration also includes the reintroduction of ecological and physical processes such as a more natural hydrologic and hydraulic regime that reconnects the river to historic floodplains and tributaries, reduced flow velocities, increased infiltration, improved natural sediment processes, and improved water quality. The study also evaluates opportunities for passive recreation that is compatible with the restored environment. A Notice of Intent for the EIS/EIR was published on November 28, 2008 (73 FR 72455).

[Docket No. CP13-83-000]

#### Arlington Storage Company, LLC; Notice of Availability of the Environmental Assessment for the Proposed Gallery 2 Expansion Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Gallery 2 Expansion Project, proposed by Arlington Storage Company, LLC (Arlington) in the above-referenced docket. Arlington requests authorization to convert two existing salt caverns, known as Gallery 2, to natural gas storage at its Seneca Lake Storage facility in Schuyler County, New York. The conversion of the Gallery 2 caverns to natural gas storage would add 0.55 billion cubic feet (Bcf) of working gas capacity, and 0.20 Bcf of base gas capacity to the Seneca Lake Storage facility, increasing the total working gas capacity from 1.45 Bcf to 2.0 Bcf.

The EA assesses the potential environmental effects of the construction and operation of the Gallery 2 Expansion Project in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969. The FERC staff concludes that approval of the proposed
