Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: The Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) provides that, under certain circumstances, a group health plan participant or beneficiary who meets the COBRA *qualified beneficiaries* definition may elect to continue group health coverage temporarily following a qualifying event that would otherwise result in loss of coverage. The COBRA provides that the Secretary of Labor has the authority under Employee Retirement Income Security Act of 1974 (ERISA) section 608 to carry out the provisions of ERISA Title I Part 6.

The DOL issued regulations to implement the ERISA section 606 notice requirements, because providing timely and adequate notifications regarding COBRA rights and responsibilities is critical to a qualified beneficiary's ability to obtain health continuation coverage. In addition, the DOL believes, regulatory guidance was necessary to establish clearer standards for administering and processing COBRA notices.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

The DOL obtains OMB approval for this information collection under Control Number 1210-0123. OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval is scheduled to expire on September 30,

2013. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. It should be noted that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 22, 2013 (78 FR 30333).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1210-0123. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
 - enhance the quality, utility, and clarity of the information to be collected; and
 - minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any

mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M-2013-039-C.

Petitioner: Rock N Roll Coal Company, Inc., P.O. Box 142, Justice, West Virginia 24851.

Mines: Mine No. 3, MSHA I.D. No. 46-08646 and Mine No. 7, MSHA I.D. No. 46-09093, located in McDowell County, West Virginia.

Regulation Affected: 30 CFR 75.1101-1(b) (Deluge-type water spray systems).

Modification Request: The petitioner requests a modification of the existing standard to eliminate the use of blow-off dust covers for the spray nozzles of a deluge-type water spray system. In support of the alternative method, the petitioner proposes to continue performing the weekly inspections and functional testing of the complete deluge-type water spray system. The petitioner states that:

(1) The system consists of an average of thirty (30) sprays along each of approximately ten primary belt-conveyor drives and an average of sixty (60) sprays along each eight secondary drives.

(2) The company currently complies with the requirements of the existing standard by providing each nozzle with a blow-off dust cover. In view of the frequent inspections and functional testing of the system, the dust covers are not necessary because nozzles can be maintained in an unclogged condition through weekly use.

(3) It is burdensome to recap the large number of covers weekly after each inspection and functional test.

The petitioner asserts that the alternative method will at all times guarantee no less than the same measure of protection afforded the miners employed at the Rock and Roll Coal Company, as the standard.

Docket Number: M-2013-040-C.

Petitioner: Blackwood Mining, 540 East Center Street, Ashland, Pennsylvania 17921.
