

Installations/Units controlled information, installations, facilities, or areas over which DOD, DON or U.S. Marine Corps has security responsibilities by identifying or verifying an individual through the use of biometric databases and associated data processing/information services for designated populations for purposes of protecting U.S./Coalition/allied government/national security areas of responsibility and information; to issue badges, replace lost badges and retrieve passes upon separation; to maintain visitor statistics; collect information to adjudicate access to facility; and track the entry/exit of personnel.

*Affected Public:* Business or other for profit; Not-for-profit institutions.

*Annual Burden Hours:* 81,667.

*Number of Respondents:* 4.9 Million.

*Responses per Respondent:* 1.

*Average Burden per Response:* 10 minutes.

*Frequency:* Annually.

Respondents are non-DOD members of the general public, businesses or other for profit and not-for-profit institutions who are seeking to access DOD, DON or U.S. Marine Corps Installations/Bases, installations, facilities, or areas over which DOD, DON or U.S. Marine Corps has security responsibilities. The respondents appear in person, record their personal identifiable information on the SECNAV 5512/1 Department of the Navy Local Population ID Card/Base Access Pass Registration Form, and submit it to the DON/USMC registrar who verifies the information against required I-9 Identity proofing documents. The registrar then enters the respondent's registration data into the Navy's Access Control Management System (NACMS) or the USMC's Biometric and Automated Access Control System (BAACS), which respectively serve as the registering Installation's/Base's Physical Access Control System where the data is stored for local physical access control requirements. Upon entry, this information is also securely transmitted and stored within the Department of the Navy's authoritative data source (Enabler System) and within the Department of Defense's authoritative data source (Local Population Database). The data is used to perform background checks to determine the fitness of non-DOD persons who are requesting access to DOD, DON or U.S. Marine Corps military installations. Upon successful registration and background check, either a Local Population ID Card or Base Access Pass is issued to the respondent. Respondents who provide their personal identifiable information

are consenting to collection of information by their action of voluntarily offering their I-9 documents, or fingerprints, irises, and facial profiles for biometric collection. Failure to provide requested information may result in denial of access to DOD installations, facilities, and buildings.

EPA will consider the

comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

**Abstract:** Regulations implementing section 301(h) of the Clean Water Act (CWA) are found at 40 CFR Part 125, Subpart G. The section 301(h) program involves collecting information from two sources: (1) The municipal wastewater treatment facility, commonly called a publicly owned treatment works (POTW), and (2) the state in which the POTW is located. Municipalities had the opportunity to apply for a waiver from secondary treatment requirements, but that opportunity closed in December, 1982. A POTW holding a current waiver or reapplying for a waiver provides application, monitoring, and toxic control program information. The state provides information on its determination whether the discharge under the proposed conditions of the waiver ensures the protection of water quality, biological habitats, and beneficial uses of receiving waters and whether the discharge will result in additional treatment, pollution control, or any other requirement for any other point or nonpoint sources. The state also provides information to certify that the discharge will meet all applicable state laws and that the state accepts all permit conditions.

There are 4 situations where information will be required under the section 301(h) program:

(1) A POTW reapplying for a section 301(h) waiver. As the permits with section 301(h) waivers reach their expiration dates, EPA must have updated information on the discharge to determine whether the section 301(h) criteria are still being met and whether the section 301(h) waiver should be reissued. Under 40 CFR 125.59(f), each section 301(h) permittee is required to submit an application for a new section 301(h) modified permit within 180 days of the existing permit's expiration date. 40 CFR 125.59(c) lists the information required for a modified permit. The information that EPA needs to determine whether the POTW's reapplication meets the section 301(h) criteria is outlined in the questionnaire attached to 40 CFR Part 125, Subpart G.

(2) Monitoring and toxic control program information: Once a waiver has been granted, EPA must continue to assess whether the discharge is meeting section 301(h) criteria, and that the receiving water quality, biological

habitats, and beneficial uses of the receiving waters are protected. To do this, EPA needs monitoring information furnished by the permittee. According to 40 CFR 125.68(d), any permit issued with a section 301(h) waiver must contain the monitoring requirements of 40 CFR 125.63(b), (c), and (d) for biomonitoring, water quality criteria and standards monitoring, and effluent monitoring, respectively. Section 125.68(d) also requires reporting at the frequency specified in the monitoring program. In addition to monitoring information, EPA needs information on the toxics control program required by section 125.66 to ensure that the permittee is effectively minimizing industrial and nonindustrial toxic pollutant and pesticide discharges into the treatment works.

(3) Application revision information: Section 125.59(d) of 40 CFR allows a POTW to revise its application one time only, following a tentative decision by EPA to deny the waiver request. In its application revision, the POTW usually corrects deficiencies and changes proposed treatment levels as well as outfall and diffuser locations. The application revision is a voluntary submission for the applicant, and a letter of intent to revise the application must be submitted within 45 days of EPA's tentative decision (40 CFR 125.59(f)). EPA needs this information to evaluate revised applications to determine whether the modified discharge will ensure protection of water quality, biological habitats, and beneficial uses of receiving waters.

(4) State determination and state certification information: For revised or renewal applications for section 301(h) waivers, EPA needs a state determination. The state determines whether all state laws (including water quality standards) are satisfied. This helps ensure that water quality, biological habitats, and beneficial uses of receiving waters are protected. Additionally, the state must determine if the applicant's discharge will result in additional treatment, pollution control, or any other requirement for any other point or nonpoint sources. This process allows the state's views to be taken into account when EPA reviews the section 301(h) application and develops permit conditions. For revised and renewed section 301(h) waiver applications, EPA also needs the CWA section 401(a)(1) certification information to ensure that all state water quality laws are met by any permit it issues with a section 301(h) modification, and the state accepts all the permit conditions. This information is the means by which the state can exercise its authority to concur

with or deny a section 301(h) decision made by the EPA Regional Office.

*Form Numbers:* "None."

*Respondents/affected Entities:* Entities potentially affected by this action are those municipalities that currently have section 301(h) waivers from secondary treatment, or have applied for a renewal of a section 301(h) waiver, and the states within which these municipalities are located.

*Respondent's Obligation To Respond:* Required To Obtain or retain a benefit.

*Estimated Number of Respondents:* Est. 50 (total).

*Frequency of Response:* From once every five years, to varies case-by-case, depending on the category of information.

*Total Estimated Burden:* 59,370 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total Estimated Cost:* \$1.3 million (per year), includes \$0 annualized capital or operation & maintenance costs.

*Changes in Estimates:* There is a decrease of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. EPA expects the numbers will decrease due to changes in respondent universe, use of technology, etc.
