DEPARTMENT OF ENERGY

Western Area Power Administration

Transmission Infrastructure Program; Proposed Transmission Infrastructure Program Updates and Request for Comments

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice and request for comments.

SUMMARY: The Western Area Power Administration ("Western") hereby

announces updates to its Transmission Infrastructure Program ("the Program" or TIP). The Program implements Section 402 of the American Recovery and Reinvestment Act of 2009 ("Recovery Act") regarding loans for the purpose of: (1) Constructing, financing, facilitating, planning, operating, maintaining, or studying construction of new or upgraded electric power transmission lines and related facilities with at least one terminus within Western's service territory, and (2) delivering or facilitating the delivery of power generated by renewable energy resources constructed, or reasonably expected to be constructed, after the date that the Recovery Act was enacted.

Through this **Federal Register** notice (FRN), Western seeks public comment on proposed updates to the Program. The proposed updates will create a more efficient and transparent process to screen and evaluate potential projects, improve communications with project applicants, promote additional interest from potential applicants that seek Western's assistance to develop a project and use Western's Recovery Act borrowing authority, and integrate the DOE Loan Programs Office into the process. The FRN also identifies the principles Western will continue using to ensure (1) that the Program is separate and distinct from Western's power marketing functions, and (2) that each eligible TIP project stands on its own for repayment purposes.

DATES: The comment period begins September 27, 2013 and ends October 28, 2013. Western will accept written comments at any time during the consultation and comment period but no later than October 28, 2013.

ADDRESSES: Send written comments to: Transmission Infrastructure Program, Western Area Power Administration, P.O. Box 281213, Lakewood, CO 80228-8213, email TXRFI@wapa.gov. Western will post information about Program developments on its Web site at <http://ww2.wapa.gov/sites/western/recovery/Pages/default.aspx>, including written comments received in response to this FRN after the close of the comment period.

FOR FURTHER INFORMATION CONTACT:

Please contact Mr. John Kral, Transmission Infrastructure Program, Western Area Power Administration, P.O. Box 281213, Lakewood, CO 80228, telephone (720) 962-7710, email TXRFI@wapa.gov. This FRN is also available on Western's Web site at <http://ww2.wapa.gov/sites/western/recovery/Pages/default.aspx>.

SUPPLEMENTARY INFORMATION:

Background

Western markets and transmits wholesale hydroelectric power generated at Federal dams across the western United States. Western's transmission system was developed to deliver Federal hydroelectric power to preference customers. Western owns and operates a transmission system with more than 17,000 circuit-mile, high-voltage lines and also markets power across 15 western states and a 1.3 million square-mile service area. Western's service area encompasses all of the following states: Arizona, California, Colorado, Nebraska, Nevada, New Mexico, North Dakota, South Dakota, Utah and Wyoming; and parts of Iowa, Kansas, Montana, Minnesota, and Texas.

Western markets excess capacity on its transmission system consistent with the policies and procedures outlined in its Open Access Transmission Tariff (OATT) on file with the Federal Energy Regulatory Commission. Western offers nondiscriminatory access to its transmission system, including requests to interconnect new generating resources to its transmission system, under its OATT.

The Program implements Section 402 of the Recovery Act, which amends Section 301 of the Hoover Power Plant Act of 1984. The Program uses the authority granted under these statutes to borrow up to \$3.25 billion from the U.S. Department of the Treasury to develop new or upgraded electric power transmission lines and related facilities, with at least one terminus within Western's service territory, that delivers or facilitates the delivery of power generated by renewable energy resources.

Western sought public comment on the policies it proposed to use to implement its Recovery Act borrowing authority as announced in a March 4, 2009 **Federal Register** notice (74 FR 9391). A public comment forum was held in Lakewood, Colorado, on March 23, 2009, and a transcript and meeting video were made available through Western's Web site. Western received comments from 40 customers and other stakeholders. All comments were reviewed and, where appropriate, incorporated into the Program. Western announced the TIP on May 14, 2009 (74 FR 22732) ("the May 2009 Notice"). In the May 2009 Notice, Western established policies on project funding, project evaluation, project development, operations and maintenance, and project rates and repayment.
