

instructions have been updated to report counterparties within the same netting set as one consolidated entry as opposed to listing the individual counterparties within the netting set, which can decrease the level of granularity. Additionally to offset the increased reporting burden, the Federal Reserve will remove two worksheets that collect counterparty-level information, as initially proposed. One commenter requested that central counterparties (CCPs) be excluded from the supervisory data collection because they have multiple levels of risk mitigation. The Counterparty schedule collects counterparty data based on the size of the exposure and not the probability of loss, and the Federal Reserve will retain the requirement to report information for CCPs.

Operational Risk Schedule

One commenter stated that the proposed combination of Operational Risk worksheets on the Summary Schedule would require a level of granularity that would decrease the relevance of the data and requested that the Federal Reserve remove this collection as a requirement. The proposal involved simply combining two worksheets into one worksheet and the data required to be reported on the proposed combined worksheet is identical to the data required previously. The proposed worksheet maintains the flexibility for respondents to determine the appropriate level of granularity that fully captures projected operational risk losses.

FR Y-14Q

The majority of comments received regarding the FR Y-14Q requested clarification of item definitions and will be addressed in the final instructions. Some comments, however, suggested modification to data items and are addressed below.

PPNR Schedule

The Federal Reserve will modify the FR Y-14Q PPNR Schedule to reflect the changes made to the PPNR worksheets in the FR Y-14A Summary Schedule, as described above.

Trading Schedule

One commenter requested that the Index Tranches and Bespoke portion of Table B on the IDR—Corporate Credit worksheet be split into two portions, an Index Tranches portion and a Bespoke portion, to avoid index tranches from being commingled with bespoke tranches containing different underlying names. The Federal Reserve will split

the proposed portion into the two aforementioned portions.

Wholesale Corporate Loan Schedule

Several commenters noted the significant effort required to obtain the information for the proposed Special Purpose Entity Flag and recommended that the Federal Reserve delay implementation of the item. The Federal Reserve will delay implementation of the item until March 31, 2014.

FR Y-14M

Domestic Home Equity Loan and Home Equity Line Schedule

One commenter noted that there is an inconsistency between the Domestic First Lien Closed-end 1-4 Family Residential Mortgage (First Lien) schedule and the Domestic Home Equity Loan and Home Equity Line (Home Equity) schedule regarding the Troubled Debt Restructuring (TDR) item. Specifically, the TDR item on the First Lien schedule applies to all loans, whereas the TDR item on the Home Equity schedule applies to only loans that have been modified. The Federal Reserve will update the TDR item on the Home Equity schedule to apply to all loans.

SUPPLEMENTARY INFORMATION:

Request for Comment on Information Collection Proposal

Abstract: As mentioned above in the *Current Actions* section, the Federal Reserve has removed the requirement to submit or map to FICO scores in the schedules effective with data as of October 31, 2013. Beginning with the data as of October 31, 2013, for the FR Y-14M and December 31, 2013, for the FR Y-14Q, respondents would have the option to continue reporting credit score items as in prior submissions or to begin submitting other credit scores with sufficient supporting documentation describing the reported credit score. To collect additional information regarding the use of credit scores and to further refine a response to this comment that minimizes burden to respondents, the Federal Reserve is extending the comment period on credit score related items for an additional 60 days from publication of this **Federal Register** notice. The appropriate schedule changes related to credit score collection would be effective for the March 31, 2014, as of date.

For the extended comment period, the Federal Reserve is requesting comment and feedback regarding the following topics (1) the types of credit scores generally used by BHCs in the lines of business reported on the FR Y-14M and

Retail FR Y-14Q schedules, (2) whether the industry generally uses internally-generated or externally-acquired credit scores, (3) issues to consider when validating the usefulness of a credit score (for example, Regulation Z considerations), (4) any industry standards with respect to credit scores, (5) mapping across industry-standard credit scores, (6) other ways credit scores can be made comparable across different scores, and (7) other composite measures, besides credit scores, that can be used to measure borrower credit worthiness.

All comments will become a matter of public record. Written comments should address the accuracy of the burden estimates and ways to minimize burden including the use of automated collection techniques or the use of other forms of information technology as well as other relevant aspects of the information collection request.

Board of Governors of the Federal Reserve System, September 24, 2013.
