SUPPLEMENTARY INFORMATION:

I. Abstract

The USPTO is required by Title 35 of the United States Code, including 35 U.S.C. 131, to examine applications for patents. The USPTO administers the patent statutes through various rules in Chapter 37 of the Code of Federal Regulations, including 37 CFR 1.16 through 1.84. The patent statutes and regulations require applicants to provide sufficient information to allow the USPTO to properly examine the application to determine whether it meets the criteria set forth in the patent statutes and regulations to be issued as a patent.

Most applications for patent, including new utility, design, and provisional applications, can be submitted to the USPTO through EFS-Web. EFS-Web is the USPTO's system for electronic filing of patent correspondence. EFS-Web is accessible via the Internet on the USPTO Web site. The Legal Framework for EFS-Web, available at http://www.uspto.gov/patents/process/fiie/efs/guidance/New_legal_framework.jsp, provides a listing of patent applications and documents permitted to be filed via EFS-Web and patent applications and documents not permitted to be filed via EFS-Web.

There are 69 forms in this collection. This total includes versions of the inventor's oath and declaration forms that were created to comply with the changes resulting from the Leahy-Smith America Invents Act, e.g., forms AIA/01, AIA/02, etc., as well as pre-America Invents Act versions of the oath and declaration forms, e.g., forms SB/01, SB/02, etc., and foreign language translations of the oath and declaration forms, e.g., forms AIA/01CN, SB/02CN, etc. On the other hand, the petitions and the papers filed to supply the name or names of the inventor or inventors after the filing date without a cover sheet in a provisional application, to correct inventorship in a provisional application, and to convert a nonprovisional application to a provisional application do not have forms associated with them.

The Office of Management and Budget (OMB) approved this collection on January 8, 2011, but the Notice of Action included terms of clearance stating that the USPTO should conduct outreach to stakeholders regarding the burden of 0651-0032 Initial Patent Applications and ways to potentially reduce it before the next renewal of the
