

NOM Market Makers lower transaction fees as compared to other NOM Participants because NOM Market Makers have obligations to make continuous markets, engage in a course of dealings reasonably calculated to contribute to the maintenance of a fair and orderly market, and not make bids or offers or enter into transactions that are inconsistent with a course of dealings.¹⁵ Also, because of the volume of message traffic required to quote upwards of 300,000 individual puts and calls, NOM Market Makers that utilize SQF Ports require more technology infrastructure and more ports than NOM Participants that are not engaged in market making. In addition, as previously stated, if a NOM Market Maker has only one mnemonic or account number, per port, the proposal would not yield a cost savings as that NOM Participant is effectively assessed a per port rate today, however that NOM Participant would have the opportunity to obtain other SQF Ports at a lower cost than is offered today. The Exchange believes that it is equitable and not unfairly discriminatory to assess all NOM Market Makers on a firm level rather than by the number of users (mnemonic) on each port and allow Market Makers to segregate their business in a manner that is conducive to their business needs.

The Exchange would continue to assess other port fees, other than the SQF Port, by the number of users (mnemonics) per port. This is the manner in which typically most data is billed. The Exchange is interested in billing NOM Market Makers at the firm level in order to provide them the means to lower costs and incentivize them to make markets on the Exchange which in turn benefits all other market participants through tighter markets and order interaction.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASDAQ does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange's proposal seeks to provide NOM Market Makers a cost savings where a particular NOM Participant may have multiple mnemonics and account numbers associated with an SQF Port due to the manner in which they account for their trading activity and operate their technology. The Exchange does not believe that providing certain NOM Market Makers the opportunity to obtain quote information as a lower cost

creates an undue burden on competition because NOM Market Makers have obligations to the market unlike other NOM Participants. Unlike other NOM Participants, NOM Market Makers add value to the market through continuous quoting¹⁶ and a commitment of capital. In addition, other market participants benefit from the tighter markets and order interaction which NOM Market Makers bring to NOM. The proposal would provide all NOM Market Makers with the opportunity to lower costs while also obtaining and utilizing the appropriate number of SQF Ports to conduct their business.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.
