SUPPLEMENTARY INFORMATION:

OMB Control Number: 1010-0114.

Title: 30 CFR Part 550, Subpart A, General, and Subpart K, Oil and Gas Production Requirements.

Forms: BOEM-0127, BOEM-0140, BOEM-1123, BOEM-1832.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior to prescribe rules and regulations to administer leasing of the OCS. Such rules and regulations will apply to all operations conducted under a lease. Operations in the OCS must preserve, protect, and develop oil and natural gas resources in a manner that is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resource development with protection of human, marine, and coastal environments; ensure the public a fair and equitable return on the resources of the OCS; and preserve and maintain free enterprise competition. Section 1332(6) states that "operations in the [O]uter Continental Shelf should be conducted in a safe manner by well trained personnel using technology, precautions, and techniques sufficient to prevent or minimize . . . loss of well control . . . physical obstructions to users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property or endanger life or health."

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104-133, 110 Stat. 1321, April 26, 1996), and Office of Management and Budget (OMB) Circular A-25 authorize Federal agencies to recover the full cost of services that confer special benefits. Under the Department of the Interior's (DOI) implementing policy, the Bureau of Ocean Energy Management (BOEM) is required to charge fees for services that provide special benefits or privileges to an identifiable non-Federal recipient above and beyond those that accrue to the public.

This ICR covers 30 CFR 550, Subpart A, General, and Subpart K, Oil and Gas Production Requirements, which deal with regulatory requirements of oil, gas, and sulphur operations on the OCS. This request also covers the related Notices to Lessees and Operators (NTLs)

that BOEM issues to clarify and provide guidance on some aspects of our regulations.

The BOEM uses the information collected under the Subpart A and K regulations to ensure that operations in the OCS are carried out in a safe and environmentally sound manner, do not interfere with the rights of other users in the OCS, and balance the protection and development of OCS resources. Specifically, we use the information collected to:

- Determine the capability of a well to produce oil or gas in paying quantities or to determine the possible need for additional wells resulting in minimum royalty status on a lease.
- Provide lessees/operators greater flexibility to comply with regulatory requirements through approval of alternative equipment or procedures and departures if they demonstrate equal or better compliance with the appropriate performance standards.
- Ensure that subsurface storage of natural gas does not unduly interfere with development and production operations under existing leases.
- Record the designation of an operator authorized to act on behalf of the lessee/operating rights owner and to fulfill their obligations under the OCS Lands Act and implementing regulations, or to record the local agent empowered to receive notices and comply with regulatory orders issued (Form BOEM-1123, Designation of Operator). This form requires the respondent to submit general information such as lease number, name, address, company number of designated operator, and signature of the authorized lessee. With this renewal, BOEM is adding a line for the signator's name and title and clarifying explanations and terminology. We are also introducing instructions on how to fill out the form specific to the Gulf of Mexico Region to better facilitate the processing of the form, given the volume of form submissions and inquiries that the Gulf Region receives. We estimate the instructions will increase the time from 15 to 30 minutes to read and fill out the form; however,

we believe the instructions will reduce the number of basic questions and result in faster processing time for respondents.

- Determine if an application for right-of-use and easement complies with the OCS Lands Act, other applicable laws, and BOEM regulations; and does not unreasonably interfere with the operations of any other lessee.
- Provide for orderly development or disqualification of leases to determine the appropriateness of lessee/operator performance.
- Approve requests to cancel leases and ascertain if/when the Secretary may cancel leases.
- Ensure the protection of any discovered archaeological resources.
- Regulate production rates from sensitive reservoirs (Form BOEM-0127, Sensitive Reservoir Information Report). BOEM engineers and geologists use the information for rate control and reservoir studies. The form requests general information about the reservoir and the company, volumetric data, and fluid analysis and production data. To assist respondents in filling out the form, BOEM is introducing instructions to clarify data entries. We expect the instructions to reduce or eliminate the number of form revisions in the future, although it could initially add 30 minutes to the form burden to read them.
- Manage reservoirs in our efforts to conserve natural resources, prevent waste, and protect correlative rights, including the Government's royalty interest (Form BOEM-0140, Bottomhole Pressure Survey Report). Specifically, BOEM uses the information in reservoir evaluations to determine maximum production and efficient rates and to review applications for downhole commingling to ensure that action does not harm ultimate recovery or undervalued royalties. The form requests information about the well and operator; test data information such as shut-in time, bottomhole temperature, kelly bushing elevation; and bottomhole pressure points that consist of measured depth(s), true vertical depth(s), pressure(s), and pressure gradient(s).

With this renewal, BOEM is adding a line to record the distance between the kelly bushing and tubing-head flange and is modifying some wording for clarification. We expect no change to the hour burden as a result.

- Determine that respondents have corrected any Incidents of Non-Compliance (INCs), Form BOEM-1832, identified during compliance reviews. The BOEM issues this form to the operator and the operator then corrects the INC(s), signs and returns the form to the BOEM Regional Supervisor. To accommodate the split of regulatory responsibilities from the former Bureau of Ocean Energy Management, Regulation, and Enforcement, BOEM will be revising this form to reflect BOEM's compliance authority and will obtain OMB approval under a separate submission.

We will protect proprietary information according to the Freedom of Information Act (5 U.S.C. 552), its implementing regulations (43 CFR part 2), 30 CFR part 252, and 30 CFR 550.197, "Data and information to be made available to the public or for limited inspection." Proprietary information concerning geological and geophysical data will be protected according to 43 U.S.C. 1352. No items of a sensitive nature are collected. Responses are mandatory.

Frequency: Primarily on occasion; monthly.

Description of Respondents: Federal oil and gas and sulphur lessees/operators.

Estimated Reporting and Recordkeeping Hour Burden: The estimated annual hour burden for this collection is 30,635 hours. The following table details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Estimated Reporting and Recordkeeping Non-Hour Cost Burden: We have identified two non-hour cost burdens. Section 550.143 requires a fee for a change in designation of operator (\$175). Section 550.165 requires a State lessee applying for a right-of use and easement in the OCS to pay a cost recovery application fee (\$2,742). These fees reflect the recent adjustment for inflation that became effective February 2, 2013 (78 FR 5836, 1/28/13). The total non-hour cost burden for this collection is estimated at \$165,492.

To comply with the public consultation process, on June 17, 2013, BOEM published a **Federal Register** notice (78 FR 36244) announcing that we would submit this ICR to OMB for approval.
