SUPPLEMENTARY INFORMATION:

Regulations 30 CFR 75.315 make it mandatory for a mine operator electing to use belt air to ventilate a working section or area where mechanized equipment is being installed or removed to maintain records used by coal mine supervisors, miners, and Federal and State mine inspectors to show required examinations and tests were conducted. These records give insight into hazardous conditions that have been or may be encountered. Inspection records help in making decisions that ultimately affect the safety and health of miners working in belt air mines. Federal Mine Safety and Health Act of 1977 section 103(h) (30 U.S.C. 813(h)) authorizes the MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219–0138.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on October 31, 2013. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. It should also be noted that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on June 14, 2013 (78 FR 35975).
