FERC–511

Title: Transfer of Hydropower License.

OMB Control No.: 1902–0069.

Type of Request: Three-year extension of the FERC–511 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the information collected under the requirements of FERC–511 to implement the statutory provisions of Sections 4(e) and 8 of the Federal Power Act (FPA).² Section 4(e) authorizes the Commission to issue licenses for the construction, operation and maintenance of reservoirs, powerhouses, and transmission lines or other facilities necessary for the development and improvement of

² 16 U.S.C. 797(e) and 801.

navigation and for the development, transmission, and utilization of power.³ Section 8 of the FPA provides that the voluntary transfer of any license is made only with the written approval of the Commission. Any successor to the licensee may assign the rights of the original licensee but is subject to all of the conditions of the license. The information filed with the Commission is a mandatory requirement contained in the format of a written application for

transfer of license, executed jointly by the parties of the proposed transfer. The sale or merger of a licensed hydroelectric project may occasion the transfer of a license. The Commission's staff uses the information collection to determine the qualifications of the proposed transferee to hold the license and to prepare the transfer of the license order. Approval by the Commission of transfer of a license is contingent upon the transfer of title to the properties

under license, delivery of all license instruments, and evidence that such transfer is in the public interest. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR Part 9.

Type of Respondents: Hydropower Project Licensees.

*Estimate of Annual Burden:*⁴ The Commission estimates the total annual Public Reporting Burden for this information collection as:

FERC-511—TRANSFER OF HYDROPOWER LICENSE

Number of respondents (A)	Number of responses per respondent (B)	Total number of responses (A) × (B) = (C)	Average burden hours per response (D)	Estimated total annual burden (C) × (D)
23	1	23	40	920

The total estimated annual cost burden to respondents is \$64,496 [(920 hours/2080 hours per year) * \$145,818/year⁵ = \$64,496].

FERC-515

Title: Rules of Practice and Procedure: Declaration of Intention.

OMB Control No.: 1902-0079.

Type of Request: Three-year extension of the FERC-515 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the information collected under the requirements of FERC-515 to implement the statutory provisions of Section 23(b) of the FPA.⁶ Section 23(b) authorized the Commission to make a determination as to whether it has jurisdiction over a proposed water

project⁷ not affecting navigable waters⁸ but across, along, over, or in waters over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States. Section 23(b) requires that any person intending to construct project works on such waters must file a declaration of their intention with the Commission. If the Commission finds the proposed project will have an impact on interstate or foreign commerce, then the entity intending to construct the project must obtain a Commission license or exemption before starting construction.⁹ The information is collected in the form of a written application, containing sufficient details to allow the Commission staff to research the

jurisdictional aspects of the project. This research includes examining maps and land ownership records to establish whether or not there is Federal jurisdiction over the lands and waters affected by the project. A finding of non-jurisdictional by the Commission eliminates a substantial paperwork burden for the applicant who might otherwise have to file for a license or exemption application. The Commission implements these filing requirements under 18 CFR Part 24.

Type of Respondents: Persons intending to construct project works on certain waters described above.

Estimate of Annual Burden: The Commission estimates the total annual Public Reporting Burden for this information collection as:

FERC-515—RULES OF PRACTICE AND PROCEDURE: DECLARATION OF INTENTION

Number of respondents (A)	Number of responses per respondent (B)	Total number of responses (A) × (B) = (C)	Average burden hours per response (D)	Estimated total annual burden (C) × (D)
10	1	10	80	800

The total estimated annual cost burden to respondents is \$56,084 [(800

hours/2080 hours per year) * \$145,818/year¹⁰ = \$56,084].

Comments on FERC-511 and FERC-515: Comments are invited on: (1)
