IV. Request for Comment

EPA is providing this opportunity for the public to provide comments and input on the new repellency awareness graphic before it is implemented. Specifically, the Agency requests comment on the following:

- Would addition of the repellency awareness graphic help you choose an insect repellent; would it improve the clarity of label information?
- Is the repellency awareness graphic's design, as shown on the program's Web page, easy to understand?
- What information would be helpful to have on our Web site about repellency awareness? Is the current information useful and clear to you?

EPA is also seeking comment on a guidance document that describes the recommended criteria and processes for companies to voluntarily request the use of this graphic. While EPA does not intend to formally respond to all comments that are submitted, they will be taken into consideration as EPA finalizes the repellency awareness graphic and guidance. If substantive comments are received, EPA may, if necessary and appropriate, revise aspects of the graphic or the guidance. In addition, EPA may decide in response to any comments, to provide additional helpful information through the Web site.
