Final Results of Expedited Changed Circumstances Review

The Department continues to find that changed circumstances exist (*i.e.*, the Japanese end-user remains unable to take delivery due to ongoing improvements and countermeasures following the March 11, 2011 earthquake and tsunami in Japan), and that it is appropriate to extend the deadline for re-exportation of this sole entry of low-enriched uranium. The Department determines that the deadline for re-exportation of this sole entry is November 1, 2015, and that this will be the final extension. The Department further determines that, if the Japanese end-user is unable to take delivery by the November 1, 2015 deadline, AREVA, the U.S. importer as well as the French exporter, will be required to re-export this sole entry to France or pay antidumping duties on the entry at the applicable rate. AREVA and the end-user will be required to submit amended certifications to U.S. Customs and Border Protection (CBP). The Department will release amended certifications to parties for comment before AREVA and the end-user are required to submit to such certifications to CBP.

Instructions to CBP

The Department will inform CBP that the deadline for re-exportation of the single entry at issue is extended to November 1, 2015. The Department will instruct CBP to collect amended certifications from AREVA and its end-user within 30 days of publication of these final results of changed circumstances review.
