

summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-7570 or send comments to LeRoy Richardson, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Report of Verified Case of Tuberculosis (RVCT), (OMB No. 0920-0026 exp. 5/31/2014)—Extension—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention

(NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

In the United States, an estimated 10 to 15 million people are infected with *Mycobacterium tuberculosis* and about 10% of these persons will develop tuberculosis (TB) disease at some point in their lives. The purpose of this project is to continue ongoing national tuberculosis surveillance using the standardized Report of Verified Case of Tuberculosis (RVCT). Data collected using the RVCT help state and federal infectious disease officials to assess changes in the diagnosis and treatment of TB, monitor trends in TB epidemiology and outbreaks, and develop strategies to meet the national goal of TB elimination.

CDC currently conducts and maintains the national TB surveillance system (NTSS) pursuant to the provisions of Section 301(a) of the Public Service Act [42 U.S.C. 241] and Section 306 of the Public Service Act [42 U.S.C. 241(a)]. Data are collected by 60 reporting areas (the 50 states, the District of Columbia, New York City, Puerto Rico, and 7 jurisdictions in the Pacific and Caribbean). The last major revision of the RVCT data collection

instrument was approved in 2009, in consultation with CDC's Division of Tuberculosis Elimination (DTBE), state and local health departments, and partner organizations including the National TB Controllers Association, the Council for State and Territorial Epidemiologists, and the Advisory Committee for the Elimination of Tuberculosis. No revisions to the RVCT are proposed in this data collection extension request.

CDC publishes an annual report using RVCT data to summarize national TB statistics and also periodically conducts special analyses for publication to further describe and interpret national TB data. These data assist in public health planning, evaluation, and resource allocation. Reporting areas also review and analyze their RVCT data to monitor local TB trends, evaluate program success, and focus resources to eliminate TB.

No other Federal agency collects this type of national TB data. In addition to providing technical assistance on the use of RVCT, CDC provides technical support for reporting software. In this request, CDC is requesting approval for approximately 5,810 burden hours. There is no cost to respondents except for their time.

ESTIMATE OF ANNUALIZED BURDEN TABLE

Types of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Local, state, and territorial health departments	RVCT Form	60	166	35/60	5,810
Total	5,810

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for

opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-7570 or send comments to LeRoy Richardson, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the

burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Annual Survey of the National Breast and Cervical Cancer Early Detection Program (NBCCEDP) Grantees—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

To improve access to cancer screening, Congress passed the Breast and Cervical Cancer Mortality Prevention Act of 1990 (Public Law 101-354) which directed CDC to create

the National Breast and Cervical Cancer Early Detection Program (NBCCEDP). Currently, the NBCCEDP funds 67 grantees including all 50 states, the District of Columbia, 5 U.S. territories, and 11 American Indian/Alaska Native tribes or tribal organizations. Grantees provide screening services for breast and cervical cancer to low-income, uninsured, and underinsured women who otherwise would not have access to screening.

Since 1991, NBCCEDP-funded grantees have served more than 4.3 million women, provided more than 10.7 million breast and cervical cancer screening examinations, and diagnosed more than 56,662 breast cancers, 3,206 invasive cervical cancers, and 152,470 premalignant cervical lesions, of which 41% were high-grade. As a comprehensive, organized screening program, the NBCCEDP supports activities including program management, partnership development, public education and targeted outreach, screening and diagnostic services, patient navigation, quality assurance and quality improvement, professional development, data management and

utilization, and program monitoring and evaluation. For clinical service delivery, grantees fund health care providers in their state/territory/tribe to deliver breast and cervical cancer screening, diagnostic evaluation, and treatment referrals for women diagnosed with cancer.

CDC issued a new Funding Opportunity Announcement (FOA) to support a new 5-year cooperative agreement for the NBCCEDP effective July 2012. This new FOA begins to shift the NBCCEDP from a focus on direct service provision to implementation of expanded evidence-based activities intended to increase rates of breast and cervical cancer screening at the population level. Though NBCCEDP grantees continue to provide breast and cervical cancer screening for uninsured and underinsured women, CDC is encouraging the implementation of strategies to increase screening rates beyond that of program-eligible women.

CDC plans to implement an annual survey of NBCCEDP program directors in order to assess program implementation, particularly related to these expanded population-based efforts. The Web-based survey includes

questions on respondent background, program activities, clinical service delivery, monitoring and evaluation, partnerships, training and technical assistance needs, and program management. Questions are of various types including dichotomous and multiple response. The estimated burden per response is 45 minutes.

This assessment will enable CDC to gauge its progress in meeting NBCCEDP program goals, identify implementation activities, monitor program transition to efforts aimed at impacting population-based screening, identify technical assistance needs of state, tribe and territorial health department cancer control programs, and identify implementation models with potential to expand and transition to new settings to increase program impact and reach. The assessment will identify successful activities that should be maintained, replicated, or expanded as well as provide insight into areas that need improvement.

OMB approval is requested for three years. Participation is voluntary and there are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hr)	Total burden (in hr)
NBCCEDP Program Directors.	CDC National Breast and Cervical Cancer Early Detection Program (NBCCEDP) Grantee Survey of Program Implementation.	67	1	45/60	50
