

This plan will guide the management of the Riverways for the next 15 to 20 years. The GMP/WS/EIS considers and describes four draft conceptual alternatives—a no-action and three action alternatives, including the NPS preferred alternative. The anticipated environmental impacts of these alternatives are also analyzed.

The no-action alternative would extend existing conditions and management trends into the future. This no-action alternative serves as a basis of comparison for evaluating the action alternatives. The NPS would maintain the Big Spring Wilderness Study Area's primitive, natural character to maintain its wilderness eligibility.

Alternative A would focus on creating visitor experiences and providing resource conditions that help visitors better understand the riverways of the past, including traditional river recreation activities reminiscent of those that occurred when the Riverways was established. Management would emphasize greater opportunities for traditional, non-mechanized forms of recreation and visitor experiences that are quieter, less crowded, and slower paced. Management would also focus on protecting natural resources and systems. Under this alternative, most of the Big Spring Wilderness Study Area would be recommended for wilderness designation.

Alternative B, the NPS preferred alternative, would enhance opportunities for visitors to discover and learn about the natural wonders and Ozark heritage of the Riverways, while maintaining a mix of traditional recreational and commercial activities. Emphasis would be placed on increasing opportunities for visitor education and connections to natural resources and cultural landscapes. Most of the Big Spring Wilderness Study Area would be recommended for wilderness designation.

Alternative C would seek to provide a diversity of outdoor recreational opportunities and experiences while maintaining the highly scenic natural setting and cultural resources. The Riverways would be managed to support higher levels and diverse types of recreational opportunities, with a focus on more intensive management to ensure that excessive impacts on resources or public safety would not occur. In addition, land-based recreational opportunities would be increased under this alternative. Approximately half of the Big Spring Wilderness Study Area would be recommended for wilderness designation.

The Draft GMP/WS/EIS focuses on key natural and cultural resources, visitor uses and experiences, soundscapes, park operations, and socioeconomic characteristics that have the potential to be affected if any of the alternatives were implemented.

Title: Solid Minerals and Geothermal Collections—30 CFR Parts 1202, 1206, 1210, 1212, 1217, and 1218.

OMB Control Number: 1012-0010.

Bureau Form Number: Forms ONRR-4430, ONRR-4292, and ONRR-4293.

Abstract: The Secretary of the United States Department of the Interior is responsible for mineral resource development on Federal and Indian lands and the Outer Continental Shelf (OCS). The Secretary's responsibility, according to various laws, is to (1) manage mineral resource production from Federal and Indian lands and the OCS, (2) collect the royalties and other mineral revenues due, and (3) distribute the funds collected under those laws. We have posted the laws pertaining to

mineral leases on Federal and Indian lands and the OCS at http://www.onrr.gov/Laws_R_D/PublicLawsAMR.htm.

The Secretary also has a trust responsibility to manage Indian lands and to seek advice and information from Indian beneficiaries. ONRR performs the minerals revenue management functions for the Secretary and assists the Secretary in carrying out the Department's trust responsibility for Indian lands.

I. General Information

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from Federal or Indian lands, that company or individual agrees to pay the lessor a share in a value of production from the leased lands. The lessee, or designee, must report various kinds of information to the lessor relative to the disposition of the leased minerals. Such information is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling such minerals.

II. Information Collections

ONRR, acting for the Secretary, uses the information that we collect to ensure that lessees accurately value and appropriately pay all royalties based on the correct product valuation. ONRR and other Federal Government entities, including the Bureau of Safety and Environmental Enforcement, the Bureau of Land Management, the Bureau of

Indian Affairs, and State and Tribal governmental entities, use the information for audit purposes and for evaluating the reasonableness of product valuation or allowance claims that lessees submit. Please refer to the burden hour chart for all reporting requirements and associated burden hours.

A. Solid Minerals

Producers of coal and other solid minerals from any Federal or Indian lease must submit current Form ONRR-4430, Solid Minerals Production and Royalty Report, and other associated data formats. These companies also report certain data on Form ONRR-2014, Report of Sales and Royalty Remittance (OMB Control Number 1012-0004). Producers of coal from any Indian lease must also submit Form ONRR-4292, Coal Washing Allowance Report, and Form ONRR-4293, Coal Transportation Allowance Report, if they wish to claim allowances on Form ONRR-4430. The information that ONRR requests is the minimum necessary to carry out our mission and places the least possible burden on respondents.

B. Geothermal Resources

This ICR also covers some of the information collections for geothermal resources, which ONRR groups by usage (electrical generation, direct use, and byproduct recover), and by disposition of the resources (arm's-length (unaffiliated) contract sales, non-arm's-length contract sales, and no contract

sales) within each use group. ONRR relies primarily on data that payors report on Form ONRR-2014 for the majority of our business processes, including geothermal information. In addition to using the data to account for royalties that payors report, ONRR uses the data for monthly distribution of mineral revenues and for audit and compliance reviews.

III. OMB Approval

We will request OMB approval to continue to collect this information. Not collecting this information would limit the Secretary's ability to discharge fiduciary duties and may also result in the loss of royalty payments. We protect the proprietary information that ONRR receives and do not collect items of a sensitive nature. Reporters must submit Form ONRR-4430. Also, ONRR requires that reporters submit Forms ONRR-4292 and ONRR-4293 to claim allowances on Form ONRR-4430.

Frequency: Monthly, annually, and on occasion.

Estimated Number of Respondents: 100 reporters.

Estimated Annual Reporting and Recordkeeping "Hour" Burden: 3,434 hours.

We have not included in our estimates certain requirements that companies perform in the normal course of business, and that ONRR considers usual and customary. We display the estimated annual burden hours by CFR section and paragraph in the following chart.

Estimated Annual Reporting and Recordkeeping “Non-hour” Cost Burden: We have identified no “non-hour” cost burdens associated with the collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501 *et seq.*) provides that an agency may not conduct or sponsor—and a person does not have to respond to—a collection of information unless it displays a currently valid OMB control number.

Comments: Section 3506(c)(2)(A) of the PRA requires each agency to “* * * provide 60-day notice in the **Federal Register** * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *.” Agencies must specifically solicit

comments to (a) evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information that ONRR collects; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

To comply with the public consultation process, we published a notice in the **Federal Register** on February 11, 2013 (78 FR 9732), announcing that we would submit this

ICR to OMB for approval. The notice provided the required 60-day comment period. We received no unsolicited comments in response to the notice.

If you wish to comment in response to this notice, you may send your comments to the offices listed under the **ADDRESSES** section of this notice. OMB has up to 60 days to approve or disapprove the information collection, but they may respond after 30 days. Therefore, in order to ensure maximum consideration, OMB should receive public comments by December 9, 2013.

Public Comment Policy: We will post all comments, including names and addresses of respondents, at <http://www.regulations.gov>. Before including your address, phone number, email address, or other personal identifying

information in your comment, you should be aware that we may make your entire comment—including your personal identifying information—publicly available at any time. While you can ask us in your comment to withhold from public view your personal identifying information from public view, we cannot guarantee that we will be able to do so.

SUPPLEMENTARY INFORMATION: This ICR is to obtain OMB approval for changes to the Annual Refiling Survey (ARS), which is used in conjunction with the Unemployment Insurance tax reporting system in each State. The primary purpose of the ARS is to verify or to correct the North American Industry Classification System (NAICS) code assigned to establishments, as well as to obtain accurate mailing and physical location addresses of establishments. As a result, changes in the industrial and geographical compositions of the economy are captured in a timely manner and reflected in BLS statistical programs. Federal, State, and Local Governmental officials, as well as private researchers, depend on accurate geographical and industrial coding based on the 2012 North American Industry Classification System Manual. This ICR has been classified as a revision, because of minor changes to the notification letters and collection instruments.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1220–0032. The current approval is scheduled to expire on December 31, 2013; however, the DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice

published in the **Federal Register** on July 23, 2013 (78 FR 44160).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1220–0032. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
