Abstract: The Clean Air Act (the CAA) contains several provisions directing EPA to require source owners to conduct monitoring to support certification as to their status of compliance with applicable

requirements. These provisions are set forth in Section 504 (operating permits provisions) and Section 114 (enforcement provisions) of the CAA. Section 504(b) directs EPA to implement monitoring and certification requirements through the operating permits program. This section allows EPA to prescribe by rule, methods and procedures for determining compliance recognizing that continuous emissions monitoring systems need not be required if other procedures or methods provide sufficiently reliable and timely information for determining compliance. Under section 504(c), each operating permit must "set forth inspection, entry, monitoring, compliance, certification, and reporting requirements to assure compliance with the permit terms and conditions." Section 114(a)(3) requires EPA to promulgate rules for enhanced monitoring and compliance certifications. Section 114(a)(1) of the provides additional authority concerning monitoring, reporting, and record keeping requirements. This section provides the Administrator with the authority to require any owner or operator of a source to install and operate monitoring systems and to record the resulting monitoring data. EPA promulgated the Compliance Assurance Monitoring (CAM) rule, 40 CFR part 64, on October 22, 1997 (62 FR 54900) to implement these authorities.

Form Numbers: None.

Respondents/affected entities: All facilities required to have an operating permit under Title V of the CAA and the state, local and tribal permitting authorities that implement the CAM program.

Respondent's obligation to respond: Mandatory under Title V of the CAA.

Estimated number of respondents: 23,235

Frequency of response: At least every 6 months per Title V and the implementing regulations at 40 CFR 70.6(a)(3)(iii)(A) and (B).

Total estimated burden: 50,473 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,031,643 (per year), which includes no annualized capital or operation and maintenance costs.

Changes in Estimates: There is decrease of 7,403,108 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is a result of the fact that most facilities are now using electronic monitoring systems that automatically record the output of the monitor, thus, resulting in a decrease in the number of labor hours needed to
